General Information

Description

The Autodesk AutoCAD Electrical Level 2 training course instructs students in how to use the Design and Detailing tools in the AutoCAD Electrical software to manage the Database, add New Components and create Reports. In the practice-intensive curriculum, students acquire the knowledge needed to Make their own Components, extract data from Schematics, and how to make reports, like a Bill of Material.

Learning Objectives

- Learn how to create Custom Component symbols
- Manage Schematic Components
- Learn how to insert panel components
- Manage Panel Components
- Learn how to Generate Multiple Reports
- Insert PLC's, and export/Import Schematics to/from Excel

Prerequisites

AutoCAD Electrical Level 1, and working Knowledge of AutoCAD for Symbol Creation
