General Information

Description

The Autodesk Inventor Level 2 training course instructs students in how to use the Design and Detailing tools in the Autodesk Inventor software to create compelling Representations in 2D and 3D CAD data. In the practice-intensive curriculum, students acquire the knowledge needed to Create Assemblies, Presentation, and more advanced tools in the 2D Drawings.

Learning Objectives

- Learn how to Add multiple Parts to an Assembly
- Create Assembly Constraints to hold parts together
- Explore Bill of Material options and setup
- Create a Presentation file from an Assembly
- Create section views and Break views
- Learn how to create and edit a parts list
- Exporting Files
- Utilize the Pack and Go command

Prerequisites

Inventor Level 1, or Working Knowledge of Part Creation
