General Information

Description

The Autodesk Inventor Simulation training course instructs students in how to use the FEA tools in the Inventor software to Analyze Parts and Assemblies. In the practice-intensive curriculum, students acquire the knowledge needed to setup a Simulation, Run the Simulation, and how to Analyze the Results.

Learning Objectives

- See to how to Setup a Model for Simulation purposes
- Run Linear Static Stress inside of Inventor
- Explore the Modal Frequencies for a Part, inside of Inventor
- Review Analysis Results
- Generate a report from the results

Prerequisites

Inventor Level 1, Inventor Level 2 Recommend but not Required
