Office Location & Hours

101-299 Courtney Park Drive, East, Mississauga, ON

Additional Information

Course Duration

1 days (7 hours)

Achievement

Certification

Course Delivery

Classroom

General Information

Description

We will begin the morning with training on BIM 360 Document Management. The last half of the day we will train on BIM 360 Design Collaboration.

This one-day class you will learn how to use BIM 360 Docs to accelerate delivery, coordinate effectively, and reduce risk on your construction projects. We will show you how to manage your projects in one digital library, at your desk or on your mobile. Publish, review, markup and approve all project plans, models and documents. With BIM 360 Design you will create packages with sets, sheets, and 3D views to share with other teams. Explore the work of other teams, compare changes between packages, and choose when to consume updates into your environment.

Learning Objectives

BIM 360 Docs

- Set up your project library
- Set permissions for folders, documents and models
- Add your construction documents to the system
- Perform design review workflows
- Best practices for document distribution
- Learn how to compare multiple sets of documents

BIM360 Design Collaboration

- Add teams (project Admin)
- Manage team members (Project Admin)
- Collaborate and publish with Revit
- Explore the team space and the package timeline
- Create, explore, and consume packages
- Compare changes between packages
