

# Revit Level 2

## Instructor Information

### Instructor

Autodesk Certified Instructor

### Email

sales@redcage.ca

### Office Location & Hours

101-299 Courtney Park Drive,  
East, Mississauga, ON

## Additional Information

### Course Duration

2 days (14 hours)

### Achievement

Certification

### Course Delivery

Classroom Training

## General Information

### Description

This class builds on the concepts and skills introduced in the Revit Essentials I class. The student will learn more advanced techniques and tools to allow for exploration of Design Options and how to accommodate renovation and addition projects across multiple phases of construction. Learn how to create and manipulate topographic surfaces and learn best practices for linking project models and site models together using shared coordinates. Students will be introduced to family editing, learning to create several 2D family types

### Learning Objectives

- Explore Design Options
- Learn about collaboration and file sharing
- Learn how to create and manipulate topographic surfaces
- Review best practices for linking project models and site models together
- Learn about additional schedule types and advanced scheduling concepts
- Learn about family editing and create several 2D family types

### Prerequisites

Revit Level 1  
Basic Understanding of Revit
