

APPENDIX

Online resources and datasets for historical research¹

To accompany

Pat Hudson and Mina Ishizu, *History by Numbers: An introduction to quantitative methods for historians*, 2nd edn (London: Bloomsbury, 2016)

This Appendix is a work in progress. We hope to update it regularly and for that we would welcome help and suggestions (via email) from any users who identify useful online resources for historical research (of all kinds) that are not currently listed. We are conscious that the site focuses upon UK and Anglophone sources and is weak in areas of cultural and literary history in particular. It is hoped, with the help of users, that these shortcomings will soon be rectified and that we can also keep abreast of the appearance of new digital sites and digitised sources.

Pat Hudson (hudsonp@cf.ac.uk)
Mina Ishizu (mina@mina-ishizu.com)

The appendix is arranged into 5 sections:

1. Reading
2. Useful contacts and guides to using digital resources and to practising quantitative history.
3. Portals, gateways and catalogues
4. Economic History datasets
5. Social and Cultural History datasets
