

## Chapter 16: Writing in the university

### Task 1

Use the internet to identify sites that report on the strategies used by successful writers at university. What strategies did they use? Make a list of strategies that you think will assist you and try them out as you write your next few assignments.

(Make sure that the internet sites you identify are reputable academic sites; for example, check that the URL includes .edu or .ac. There are many commercial sites that give poor advice on academic writing.)
