

|    |                                                                 |                                                                                                                                                                                                                                                        |
|----|-----------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A: | Yuh comin' down early?                                          | Question FPP, designed to project a yes answer (i.e. a yes answer would preserve preference for agreement)                                                                                                                                             |
|    |                                                                 | Dispreferred response: answer does not agree with the projected answer in the question.<br><br>B's answer is delayed in the turn by:                                                                                                                   |
| B: | Well,                                                           | Delaying device - works to alert the recipient to an up-coming action that is not straightforward and/or dispreferred                                                                                                                                  |
|    | I got a lot of things to do before getting cleared up tomorrow. | Warrant – explains why B won't be coming early.                                                                                                                                                                                                        |
|    | I don't know.                                                   | Marker of uncertainty.                                                                                                                                                                                                                                 |
|    | I w- probably won't be too early                                | Mitigated disagreeing answer (not repair from w- to probably won't may involve repair from a less uncertain to a more uncertain formulation (probably). Note also the formulation 'won't be <i>too</i> early' as a mitigated form of 'won't be early'. |
