

Appendix K

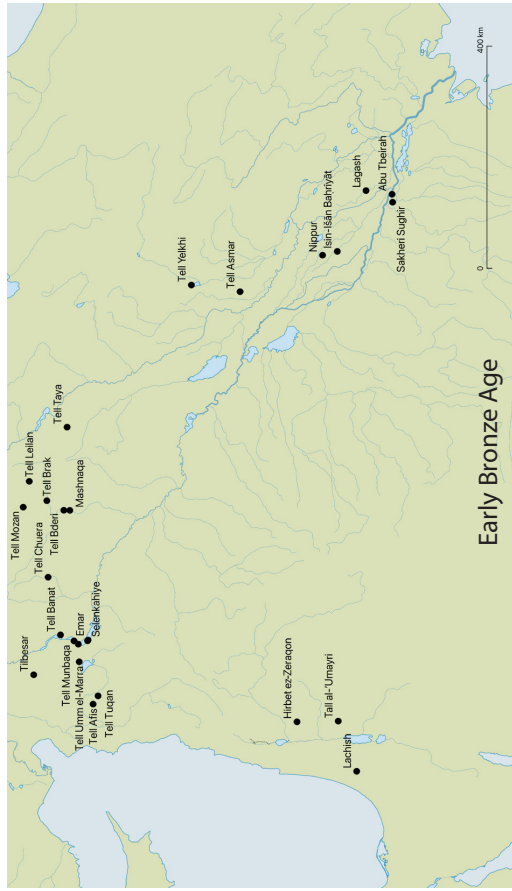

Additional distribution maps

The maps here are intended as supplementary, providing more detailed information (in colour) and illustrating the chronological and geographical distribution of specific material. They are based on the data listed in Appendices F, G, H and I. As mentioned in Chapter 1, the distribution of equid remains and equid-related finds are also a reflection of the state of research, and 'gaps' on the map do not necessarily equal an actual absence. The maps included here are:

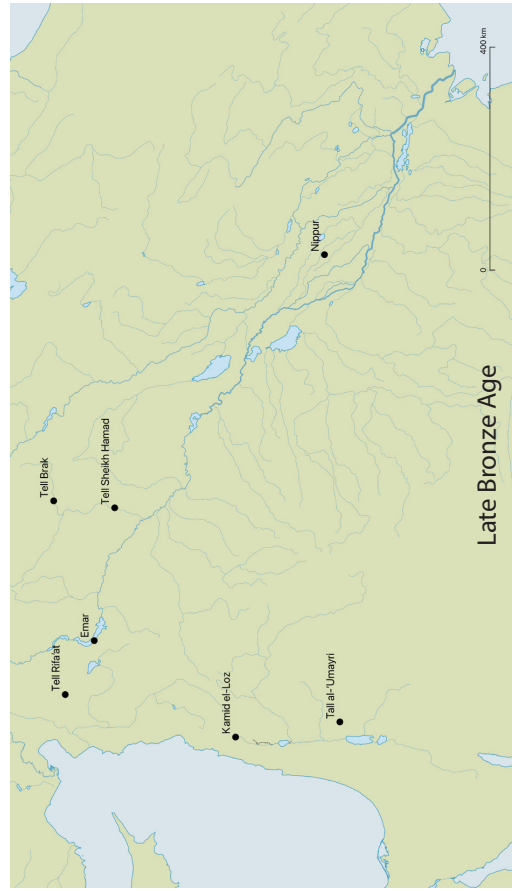

- K1. Sites with remains of *Equus*
- K2. Sites with remains of *E. hemionus*
- K3. Sites with remains of *E. asinus*
- K4. Sites with remains of *E. caballus*
- K5. Selected routes travelled by equids in the Bronze Age Near East
- K6. Sites with complete or nearly complete equid skeletons
- K7. Sites with equid remains associated with human burials
- K8. Sites with terracotta equid figurines
- K9. Sites with iconography of equid and wheeled vehicle
- K10. Sites with iconography of equid and rider

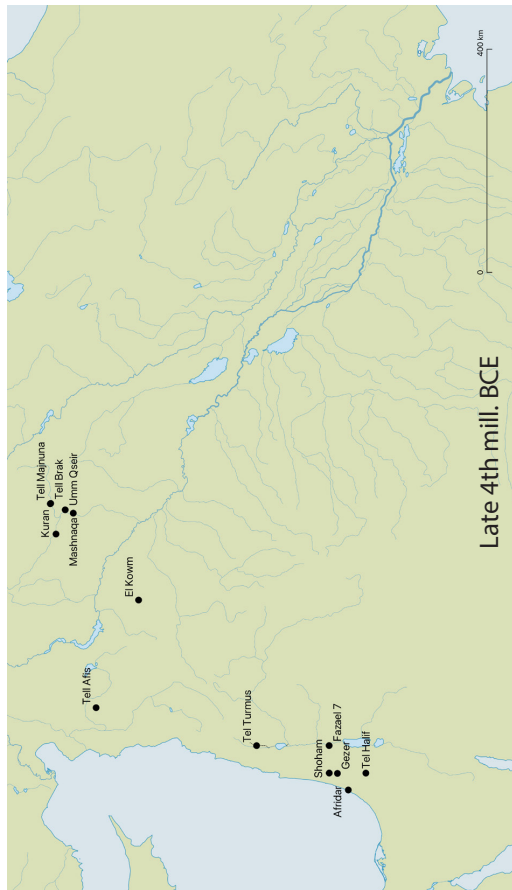

K1. Sites with remains of Equus

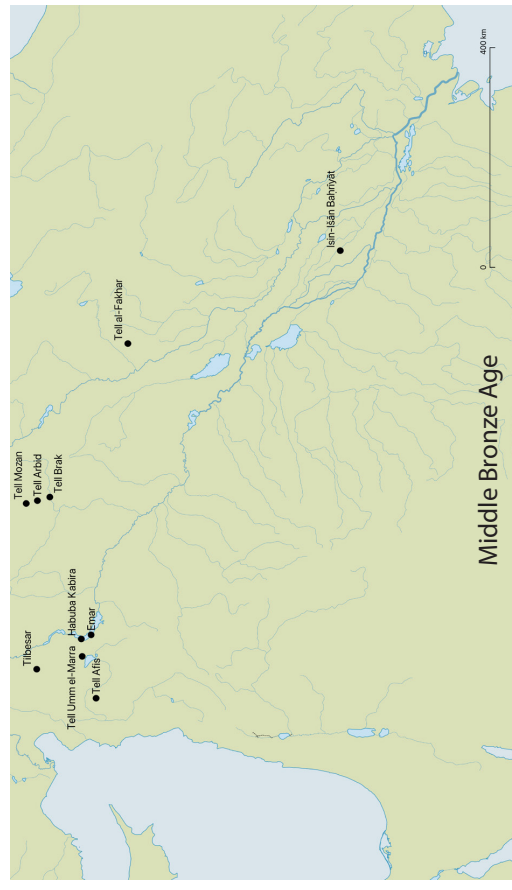

Early Bronze Age

Late Bronze Age

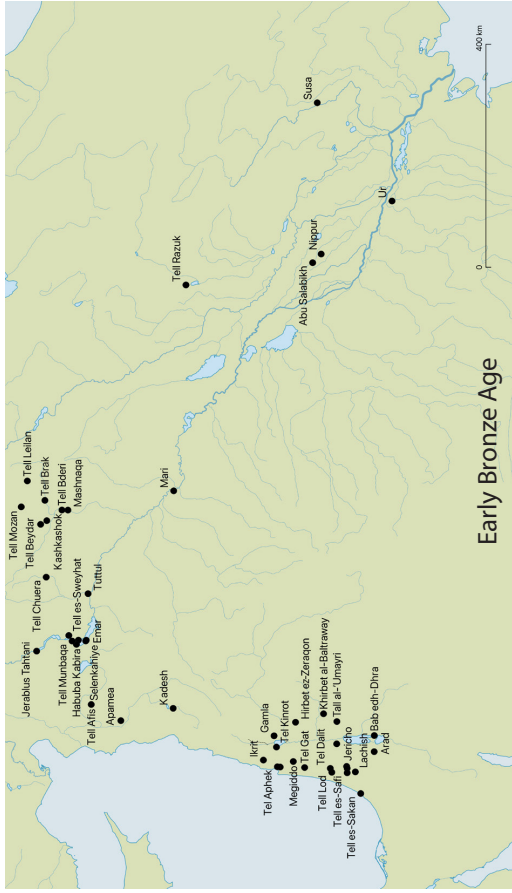

Late 4th mill. BCE

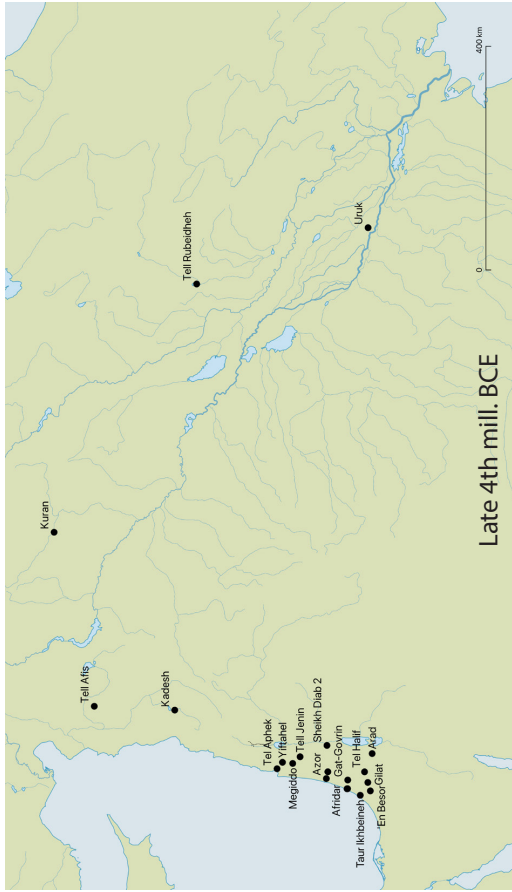

Middle Bronze Age

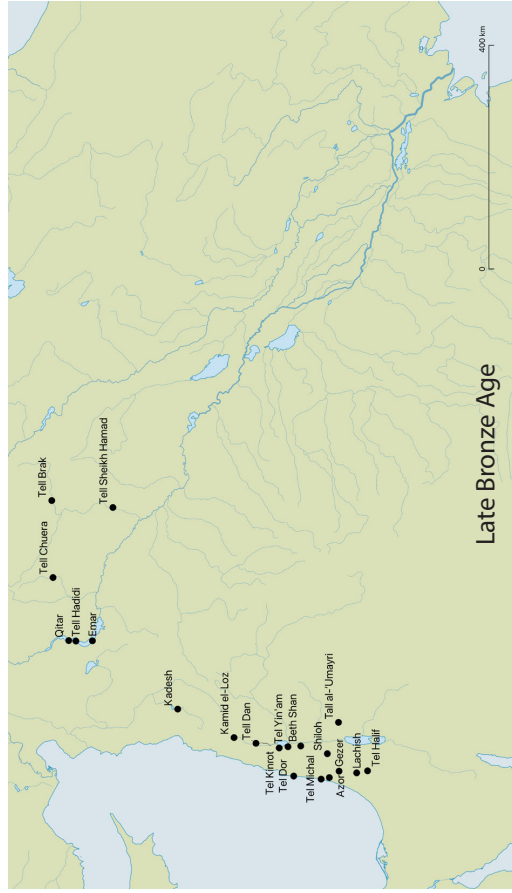

K2. Sites with remains of *E. hemionus*

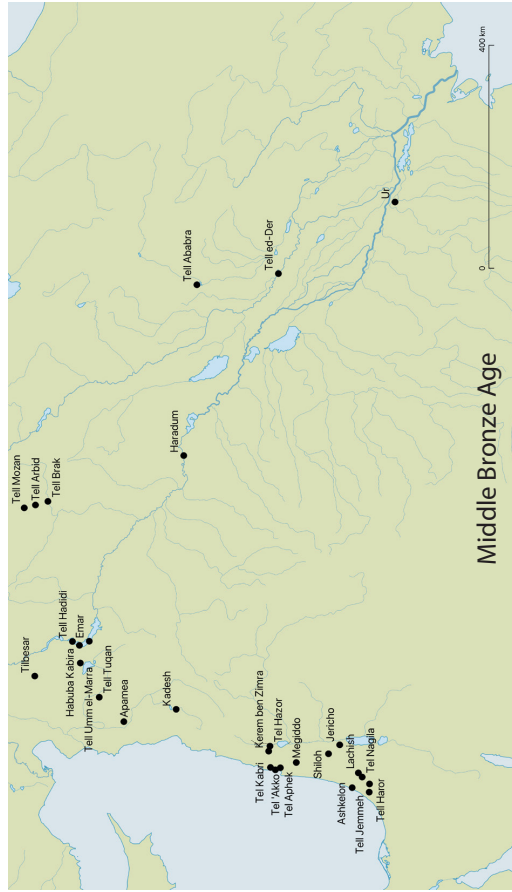

Early Bronze Age

Late 4th mill. BCE

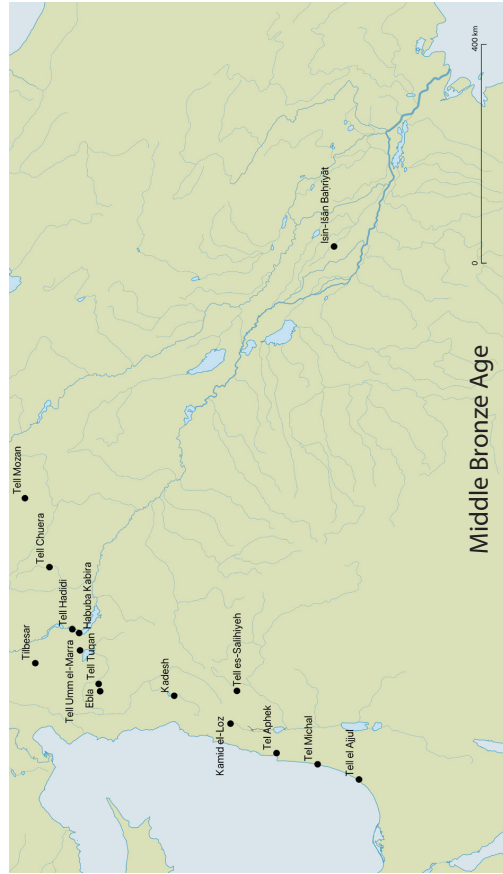

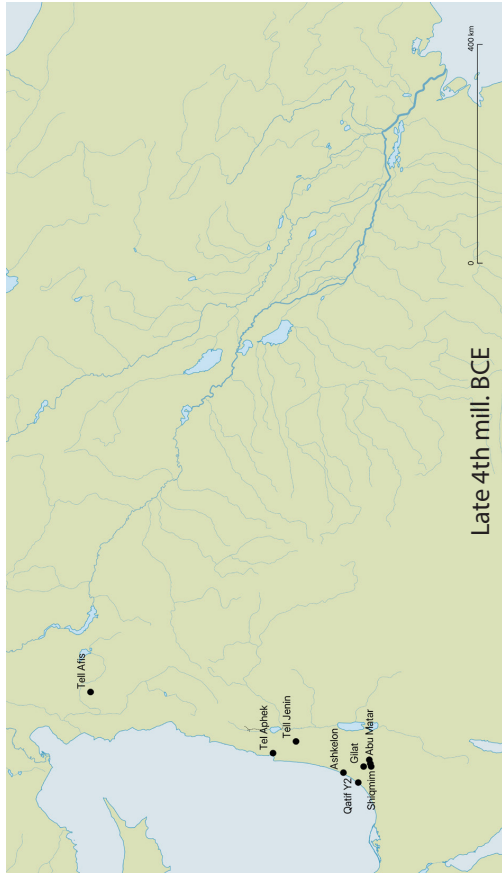

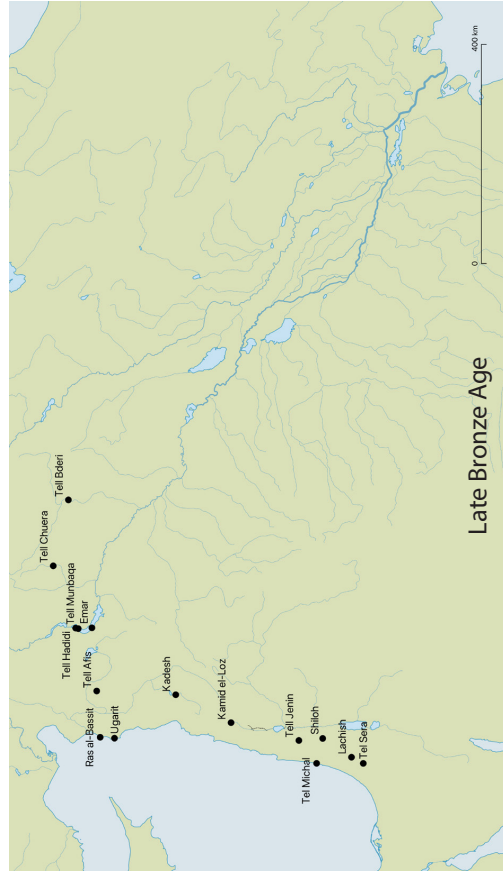

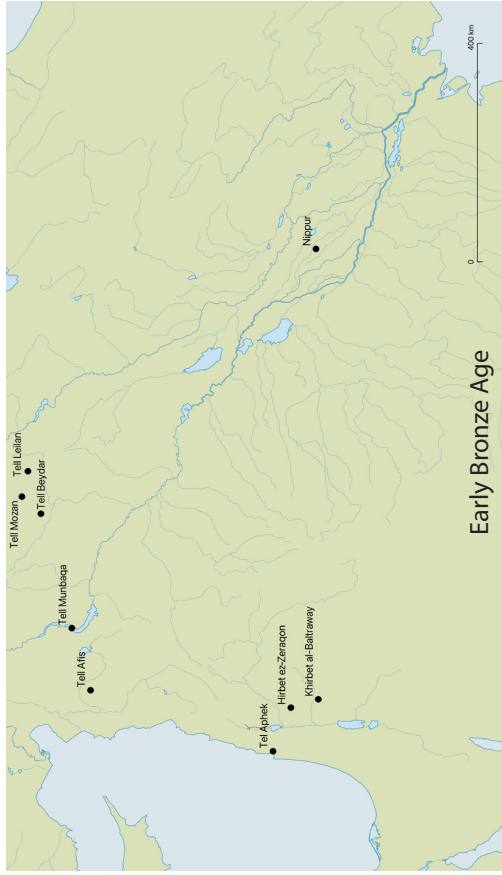

Late Bronze Age

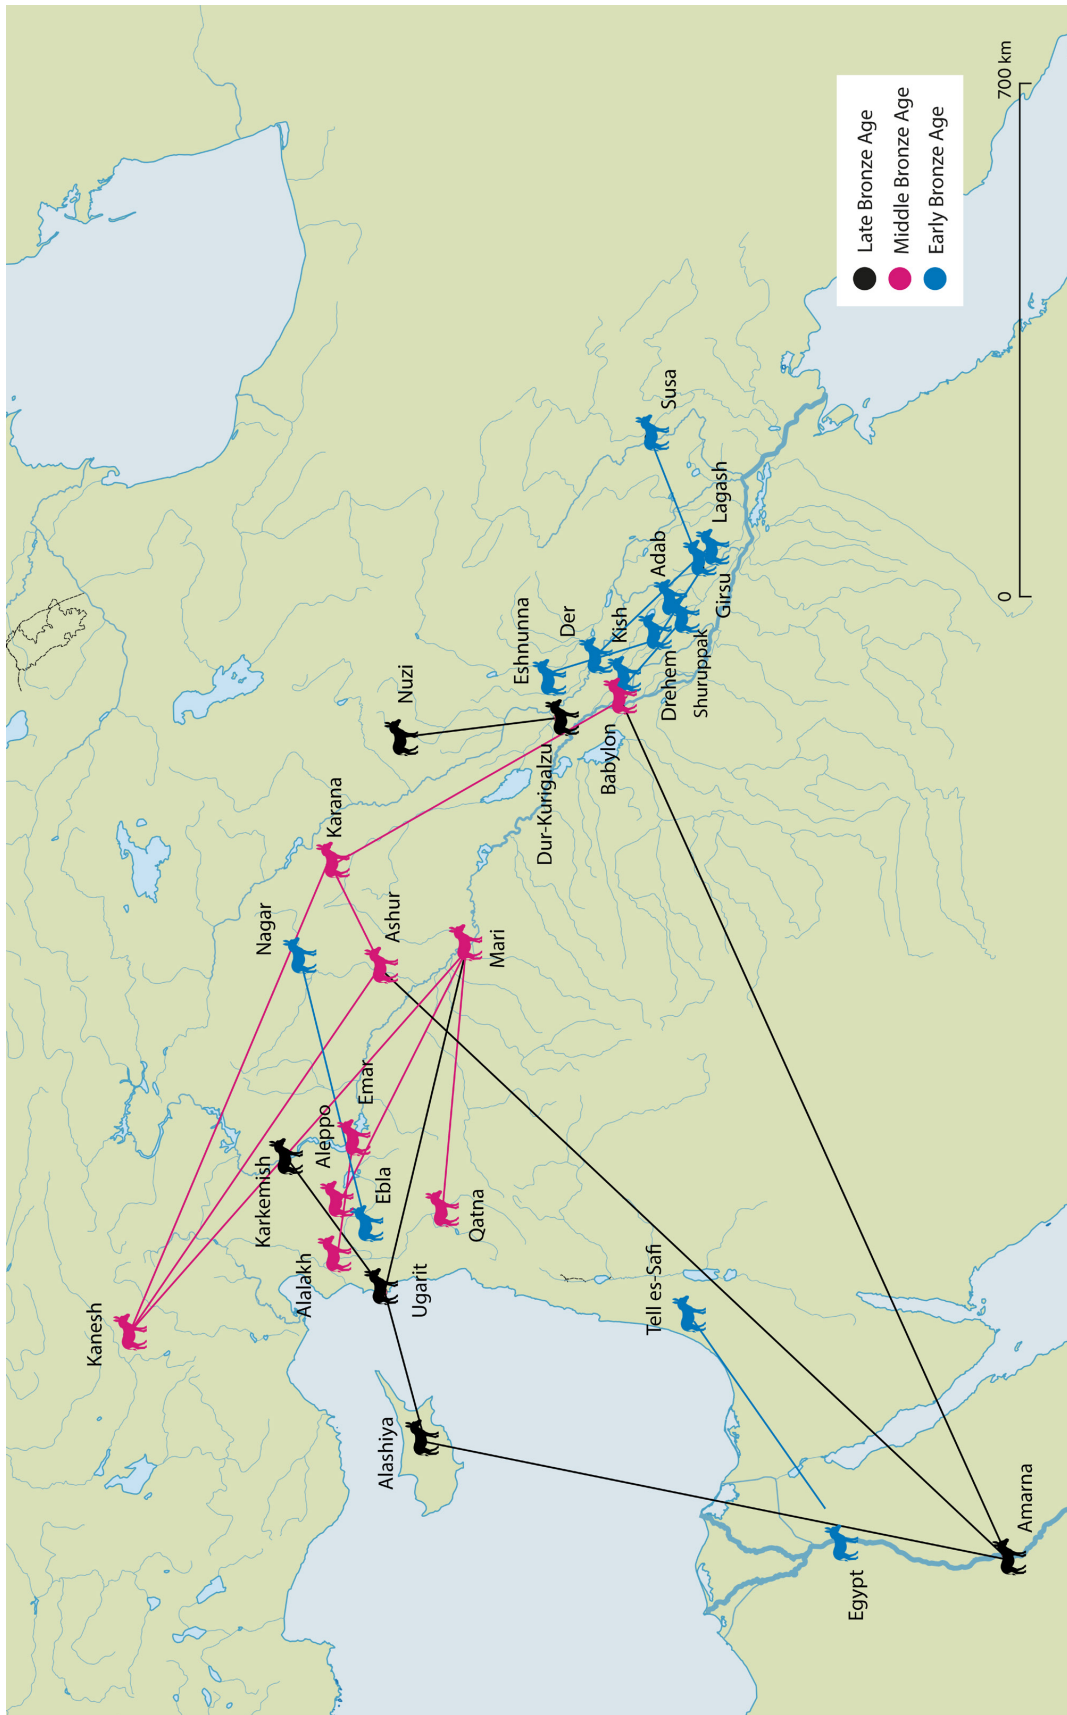

Middle Bronze Age

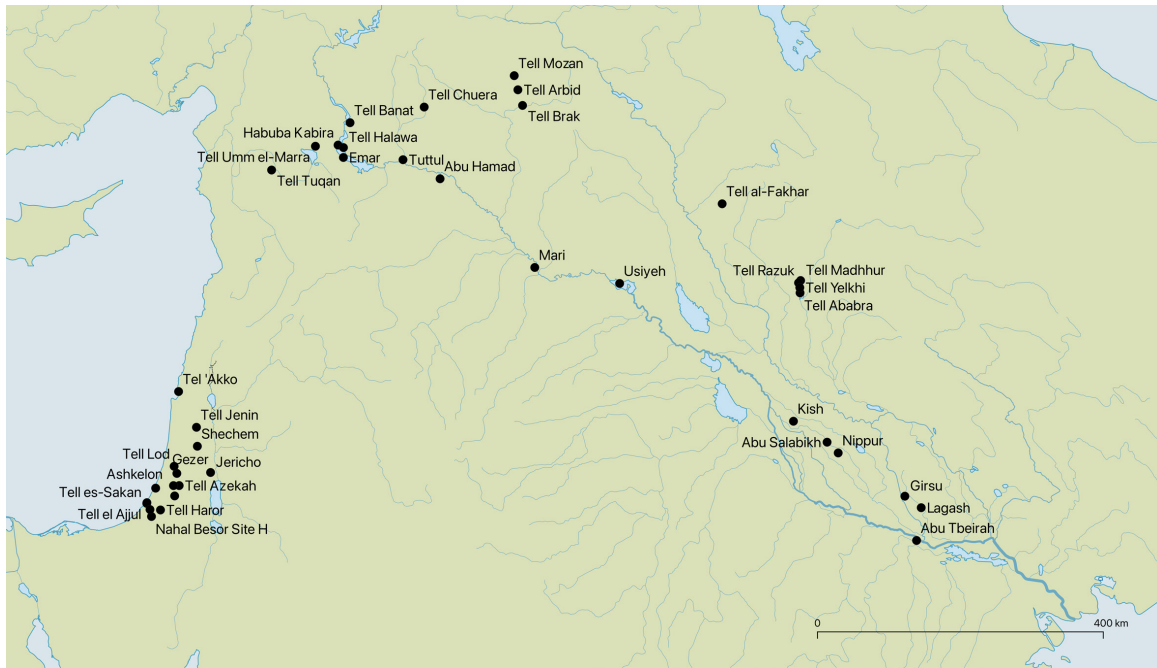

K3. Sites with remains of *E. asinus*

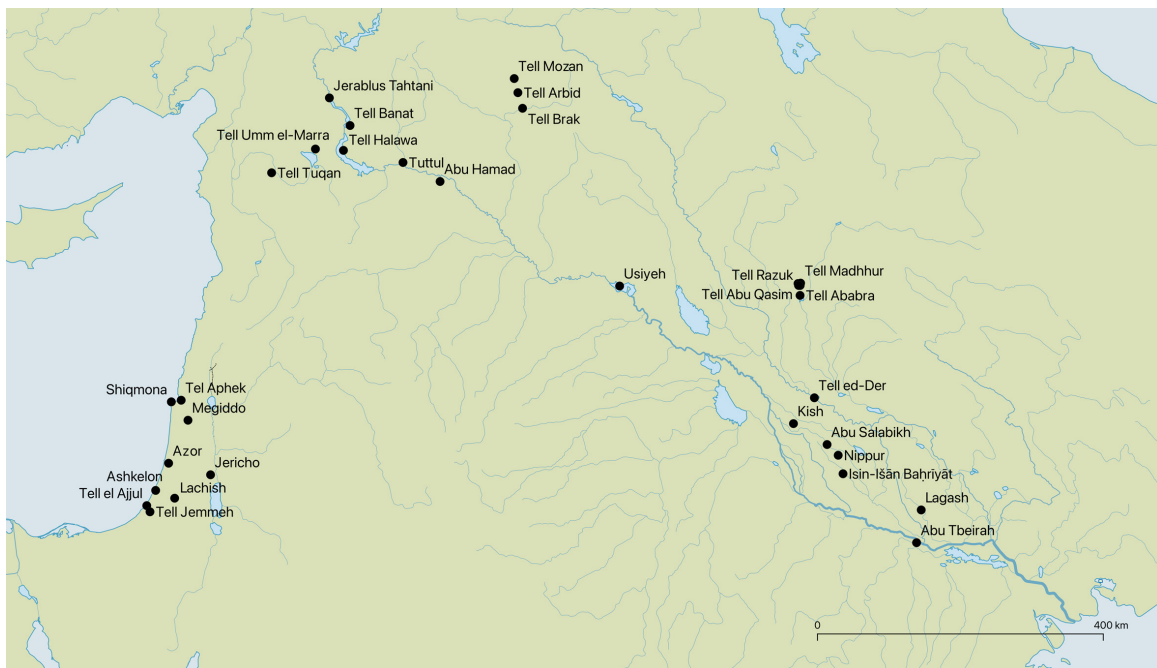

K4. Sites with remains of *E. caballus*

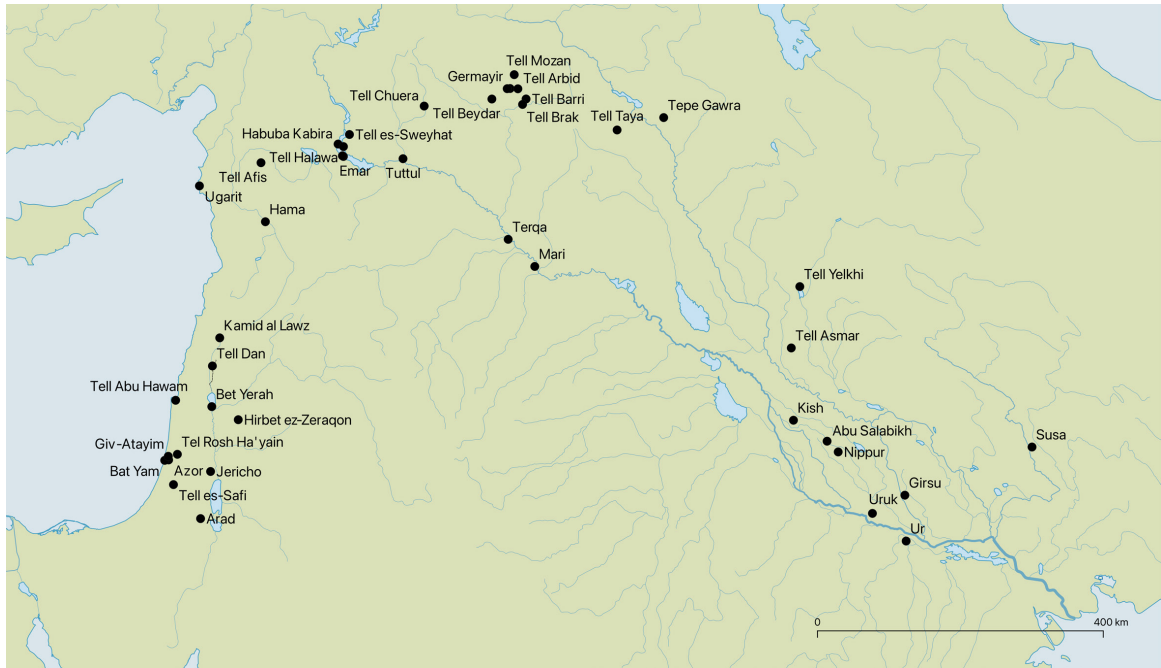

K5. Selected journeys made by equids
(direct line, not reflecting actual route taken)

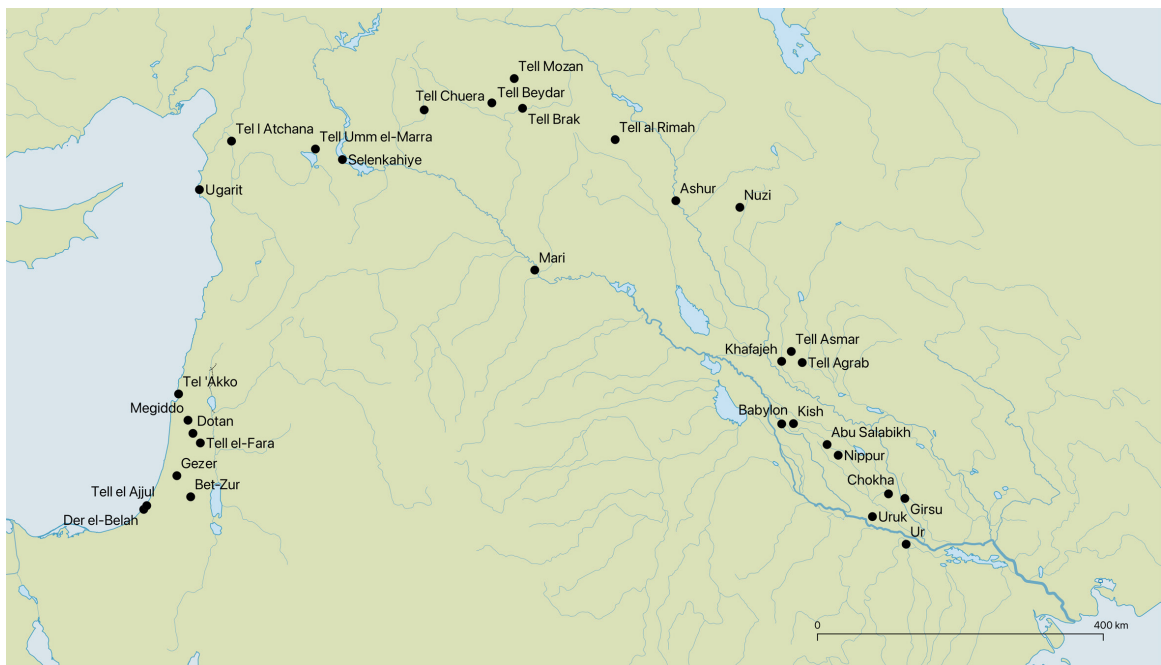

K6. Sites with complete or nearly complete equid skeletons

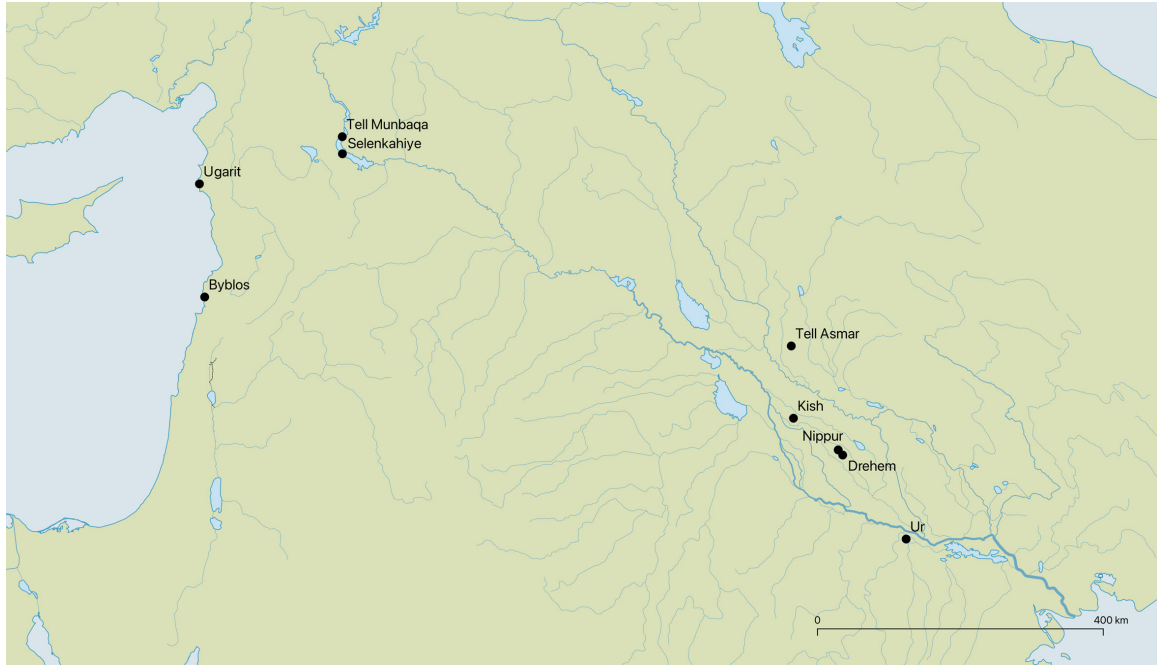

K7. Sites with equid remains associated with human burials

K8. Sites with terracotta equid figurines

K9. Sites with iconography of equid and wheeled vehicle

K10. Sites with iconography of equid and rider
