

Tacitus *Annals* I

Pedagogical Approaches

Use the following pedagogical strategies to help enliven the narrative of the Pannonian mutiny:

- Suggest that students create a storyboard with images and labels.
- Advise students to create a timeline, adding appropriate images and descriptions.
- Propose a collaborative activity in which key events are ‘performed’ using plastic figures/lego/plasticine.
- Suggest that students write an abbreviated script covering the narrative of the prescription then perform it.
- Suggest that students create an animation (using GoAnimate or similar...).
- Propose that students construct a ‘live’ Twitter feed to reflect the developments in the mutiny, broadcasting news to those following from afar.
