Bring the ancient world to life

**Explore over 3,000 years of history from the Bronze Age to Late Antiquity**

This collection provides students and researchers with a comprehensive exploration of the ancient world. Spanning Egypt, Mesopotamia, China, Persia, and beyond, it balances general histories and archaeological site studies with social and cultural analyses. It also features specialized thematic works focusing on key subjects such as, religion, warfare, daily life, philosophy, art, and more.

- › Discover a vast array of ancient civilizations and regions, from the great empires of Egypt, Mesopotamia, Persia, Greece, and Rome, as well as lesser-studied cultures like the Etruscans, Illyrians, Phoenicians, the Maya, and Hasmoneans.
- › Read encyclopedias and student handbooks, as well as historical dictionaries - valuable entry points for beginners approaching the subject for the first time.
- › Compare civilizations, empires, and cultural systems, fostering a world history perspective rather than a narrow, single-region focus.

This rich collection of titles enables comparative, thematic, and critical engagement with the ancient world. It equips students with the knowledge, analytical skills, and primary source literacy needed for academic study, while giving instructors a flexible and comprehensive toolkit for teaching both introductory courses as well as specialized seminars.
