1. Important Safety Information

Before using Nexus Home Ultimate, please read the following information to avoid any potential dangers:

i. Disconnect the device from the power supply before cleaning. Clean device with a damp cloth, do not use detergents under any circumstances.

ii. Do NOT place the device near heat sources such as ovens, microwaves, hot pans and geysers

iii. Keep out of reach of children.

iv. You should not open the device under any circumstances. This must only be carried out by a qualified engineer.

v. Do NOT touch the device with wet hands due to risk of electric shock.

2. What is Nexus Home Ultimate?

Nexus Home Ultimate is a revolutionary automation device that will make your home and life smarter than ever before. This device enables you to have complete control over your Zigbee supported devices (Yale Lock, Sengled Lights, Cree Bulb, Zigbee Motion & Door Sensors), Bluetooth supported devices(Microbot Push, Tracker, Linkey Lock), Wi-Fi supported devices (Brilliant Wi-Fi Devices, Philips Light, LIFX light) and IR enabled devices at home or business.

3. Features of Nexus Home Ultimate

- Nexus Home Ultimate allows you to combine and control all your Infrared remotes, Zigbee supported devices (Yale Lock, Sengled Lights, Cree Bulb, Zigbee Motion & Door Sensors), BLE supported devices (Microbot Push, Tracker, Linkey Lock) & Wi-Fi supported devices (Brilliant Wi-Fi Devices, Philips Light, LIFX light) into one Hub to use mobile application acting as a universal remote.
- Using Nexus Home Voice Act smart home skills for Google Home and Alexa, you can automate complex tasks with simple voice commands. For example, say 'Alexa, turn on the AC' to power ON your AC.
- Schedule your activities as per your convenience on a daily basis through the Nexus Home app, making your life simpler and smarter. For Example, 'Turn off AC at 11pm.'
- Control your "Nexus Home" supported devices from anywhere in the world using your smartphone.
- Works with over 110+ devices and is compatible with remotes of most brands

4. Technical Specifications of Home Ultimate

Input	100 ~ 240V, 50/60Hz, 0.25A Max
Output	5V DC, 1.2A
Protocols Supported	WiFi (2.4 GHz), BLE, Zigbee and IR (Infrared)
Range	Upto 10 metres
Operating Temperature	0º C to 40º C
Dimensions	140 x 140 x 20.5 mm
Amazon Alexa Integration	Yes
Google Assistant Integration	Yes

5. What's in the box?

1. Home Ulitmate

Hub

2. Adapter

3. USB Cable

4. Mounting Plate

5. Screws

6. Know your Home Ultimate

7. Hardware Installation Instructions

Connect one end of the micro USB cable to the micro USB port on the Home Ultimate and the other end to the power adapter, and plug the power adapter into the electrical outlet.

8. Status Indicators on Nexus Home Ultimate ^{nexus}

Solid Red	Ready to connect/configure and not added to any account
Blinking Red	Unable to connect to the Access point of Hub, i.e. Access point is not available
Blinking Blue	Hub is trying to connect to it's Access Point and Hub Access Point is not having internet
Solid Blue	Added to account and it's fully functional (Hub is connected to Access Point)

9. Nexus Home App

Nexus Home App lets you manage your home or business from anywhere, anytime. Manage your devices from anywhere in the world with one simple Nexus Home App.

You can download the Nexus Home App from the Play Store or App Store:

Play Store Url:

https://play.google.com/store/apps/details?id=com.brilliantlighting.nexus

App Store Url:

https://apps.apple.com/us/app/nexus-home/id1500221391

Nexus Home App allows you to do the following:

- **1.) Remote Control:** Control Home appliances from anywhere.
- 2.) Simultaneously Control: Control multiple devices with one App.
- **3.) Timer:** Set timer to perform multiple functions.
- **4.) Device Sharing:** One tap to share devices among family members.
- 5.) **Easy Connection:** Easily and quickly connect App to devices.
- **6.) Universal IR Remote Control:** Inbuilt universal remote control with its on board IR blasters and is capable to work with different devices at Home. Lets your IR legacy devices work with new smart devices.

10. Setting Up Nexus Home Ultimate

10.1 Sign Up

After downloading the Nexus Home App, allow Nexus Home to use your Location to use some critical features.

If you wish to receive notifications, click on **Allow.**

User Name	
Email ID	
Password	۲
Password must be alphanumeric and	at least six characters.
Re-enter Password	۲
Phone number (Optional) +61-	
I agree to the Terms of Services	
Sign Up	

Open Nexus Home App and proceed further by clicking on **Sign Up.**

Enter details in all the mandatory fields and then tap on **Sign Up.**

Tapping on Sign Up will send a verification email to the provided email ID. Click on the link in the email to verify your account.

After the verification of Email ID, Nexus Home app will automatically redirect to the screen displaying "Congratulations" as the account has been created successfully.

10.2 Nexus Home Ultimate Setup

10.2.1 Home Ultimate Setup using Bluetooth

can

your Wi-Fi

Now, Power up the device and make sure the LED light is glowing in solid Red color.

Once the pop-up appears, click on **OK** to allow Nexus Home to use Bluetooth.

Ensure that your mobile device and Home Ultimate are within 5 meters of your Wi-Fi Router.

1:05 ৵		🗢 🔳

Select your preferred Wi-Fi network to connect Home Ultimate to the network.

Enter the password for the selected Wi-Fi network and tap on **Connect Wi-Fi.**

Click **OK** on the pop up screen. Now, open your Wi-Fi settings in phone your and connect your phone to the Wi-Fi same which network to Home Ultimate is connected and navigate back to Nexus Home App.

The Home Ultimate connects to your Wi-Fi network, Cloud and mobile App.

Home Ultimate is added successfully.

11. App Guide

11.1 Dashboard

Dashboard displays the Favourite devices/actions selected by the user, providing ease of control of those devices and notifications pertaining to the devices connected with Home Ultimate.

Favourites

It displays the devices/actions added as **Favourites** by the user. Devices/Actions used more often can be added under this category.

Note: Only upto 6 devices/actions can be added as Favourites.

Notifications

The notifications space on the Dashboard displays notifications for all the devices connected with Home Ultimate.

Eg: Devices Added & Deleted Notifications, Actions Enabled or Disabled Notifications, Action Started and Ended Notifications, Device Online and Offline Notifications.

The notifications can be turned ON/OFF from the **Notify me** toggle under **Settings.**

11.2 Devices

11.2.1 Rooms

Addition of Rooms

The **Rooms** tab displays all the Rooms available for your Home. The rooms can be added/deleted or the background image of the rooms can be changed here.

Click on Add a Room under Rooms tab. Provide a name to the room in Room Name. Now, click on + to change the background image of the room.

Click on **Camera** to click a picture or tap on **Camera Roll** to select a picture from your mobile device gallery.

Click on **Done** at the top right corner of the screen.

Editing Rooms

Go to **Rooms** under **Devices** tab. Select the room that needs to be edited.

Click on **Edit** at the top right corner of the screen.

The **Add Device** tab allows the user to add/delete devices compatible with Home Ultimate.

Deletion of Rooms: Option 1

Change the background image or the Room name and click on **Done.**

After clicking on **Edit** under the Rooms tab of Devices, click on **Delete Room** at the bottom of the screen.

A pop-up will appear mentioning "Room deleted successfully."

Deletion of Rooms: Method 2

Click on **Edit** at the top right of the screen on the Rooms tab under Devices.

Click on the Red "-" icon against the room that needs to be deleted.

Click on **Delete** when the pop-up appears.

Select the **Rooms** that has your devices by clicking on it under the Rooms tab of Devices.

Click on the **Edit** at the top right corner of the screen.

Click on Red "-" icon against the device that you want to delete.

A pop-up appears confirming that the Device has been deleted successfully.

11.3 Security

Home Ultimate security feature has the following modes:

- ARM
- DISARM
- IN-HOUSE

ARM Mode

When this mode is enabled, all the security devices that are linked to Home Ultimate are activated.

Whenever an unauthorized event is triggered, the Siren is triggered.

Activate ARM mode

Tap on the **ARM** button and click on **OK** once the pop up appears.

In case of an intrusion, push notifications are sent to all devices that are logged into the Nexus Home App and SMS notifications are sent to upto 9 contacts.

Edit ARM Mode

Click on Edit on the Security tab.

Tap on the **ARM** icon.

You must install security devices like door sensors, motion sensors, sirens etc. for using this feature effectively.

5:19 7		🕈 🕞

	<u></u>	

Select a desired Hub from the list. **Note:** You can only control the devices which are connected to the selected Hub.

A screen appears "Linking your Brilliant Smart Home Account". All Devices and Actioned in your account will be available in the HOME Page.

Now return to the home screen in your Google home app, tap the mic icon at the bottom & say "Ok Google, turn ON/OFF device_name".

Google Home will not recognize the rooms in the App. Please try to use other browsers if you face issues with Google Chrome browser while linking your Brilliant Smart account with Google Home.

12.2 How to link Amazon Alexa to Home Ultimate

Add Device Lists Reminders & Alarms Contacts Routines Things to Try Skills & Games Activity Help & Feedback Settings After setting up your Hub, open ALEXA app & tap menu icon at the top left corner.

Tap Skills & Games.

Tap the Search icon at top right corner of the screen and search for **Brilliant Nexus**.

Enter your Nexus Home App credentials & tap Login.

Select the desired Hub from the list.

Brilliant Nexus is now successfully linked. Now, go back to Alexa Home Screen.

Discover Devices Smart Home devices must be discovered before they can be used with Alexa.

After successfully linking the skill a screen appears Discover Devices tap "**Discover Devices**".

Every time you add a new device/action to the app, make sure you follow the above process to Discover Devices.

nexus

A screen appears "Alexa is looking for devices to connect..", wait until you see the next screen.

Now goto the home screen in your Alexa app, tap Ask Alexa icon at the bottom of the screen & say "Alexa turn ON/OFF device_name".
