Modern Meets Traditional Toughness

A century of head protection innovation defines the Bullard CEN10™ Helmet. Featuring sleek, low-profile vented and non-vented designs, Flex-Gen smooth ratchet suspension system, an impact-resistant helmet shell with inner foam comfort liner, and an integrated 3-point chinstrap.

The CEN10 provides wearers with the reliability, comfort, and toughness expected from a Bullard industrial hard hat. CEN10 meets ANSI/ISEA Z89.1 Type I, Class E and G requirements and the vented model meets ANSI/ISEA Z89.1 Type I, Class C requirements.

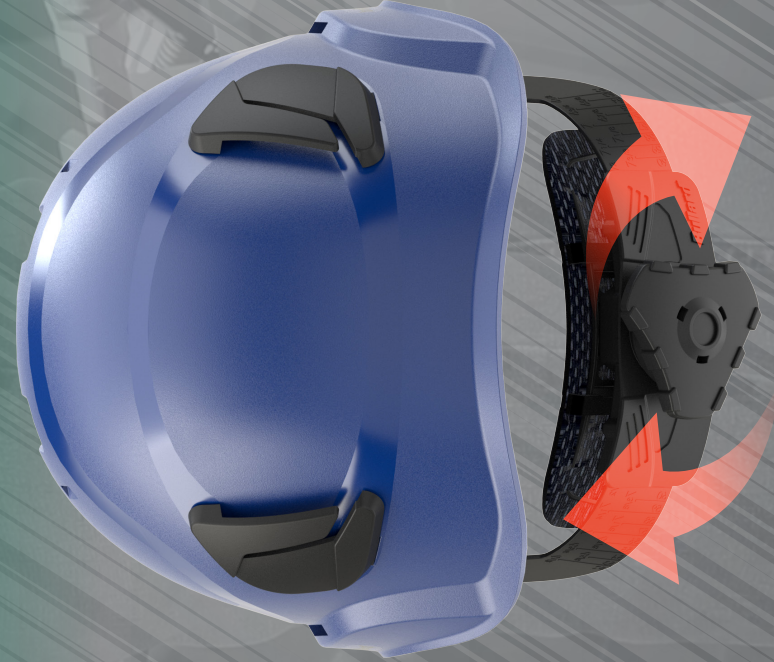

Protecting Your Brain

The modern design of the CEN10 reduces peak force to the wearer's neck and transmits less force to the head providing additional protection to the user's brain.

The helmet is equipped with a 3-point chinstrap to ensure the CEN10 securely stays on the wearer's head when working at heights. The integrated 3-point chinstrap on the CEN10 provides added wearer protection from worksite accidents including the most commonly reported slips, trips, and falls.

Achieving the Perfect Fit

Equipped with the patented FlexGen suspension system, the CEN10 lets wearers quickly adjust the fit of their helmet for all-day comfort. The CEN10 comes with multiple comfort liners to enhance fit while keeping the sweat off of you. The CEN10 provides maximum protection with a comfortable baseball cap fit.

Large, easy to turn knob to arrive at a snug, comfortable fit.

Versatile Personalization

Customize the CEN10 Helmet in four dedicated locations with a company logo with Bullard's industry-leading deco program. Add striping to the CEN10 around the ear, brim, and rib for added visibility on worksites. The CEN10 is available in white, dove grey, red, orange, hi-vis yellow, and Kentucky blue colors.

Customize Your CEN10

Face Protection

Add face protection with Bullard's 312B bracket that can be used with any Bullard visor.

Personalization

CEN10 is available in seven distinctive colors and with striping and logos.
