

The Standard Series

Setting the standard for comfort,
style, and versatility

The Standard by Bullard takes style and comfort to a new level. A low-profile shell, along with Bullard's 3-rib design and patented suspension system, provide maximum comfort with a look workers prefer.

Comfort

The Standard Series is available with two nylon suspension options; self-sizing pinlock or ratchet. Both suspension styles have large, pillowed, replaceable brow pads. Models S61, S62, and S71 come standard with a cotton brow pad. Model S51 comes standard with a poly brow pad.

The Bullard patented Flex-Gear® ratchet suspension is designed with built-in flex points that allow the ratchet housing to conform to the back of the worker's head, ensuring a snug, comfortable fit. The nape cushion adds to the comfort and overall fit of the suspension.

Easy to adjust vertical height settings, two front and two rear, provide a customized fit which will increase wear time and worker compliance. All vertical height adjustment settings ensure that the hard hat remains centered on the head. The Standard is also offered in a vented design (Model S62). The vented model offers increased air circulation, resulting in optimal worker comfort.

Style

The low-profile shell design of the Standard cap combines a perfect fit with a look that workers prefer. The sleek, trim shell profile is the most stylish in the industry. The Standard Series also includes a full-brim style (S71) for additional protection from exposure to sun and rain.

Hard hat colors can be used to identify different job functions, trades, or departments within an organization. With this in mind, Bullard has chosen 20 of the most popular shell colors for its standard color offering. Custom and special colors are also available upon request. Contact Bullard's Customer Service department for details.

Versatility

The Standard Series hard hats come equipped with accessory slots for mounting a variety of attachments including faceshields, welding helmets, earmuffs, and headsets.

Brow pads on all Standard Series hard hats are replaceable. Replacement brow pads can easily be velcroed on in place of, or over the original pad. This feature combined with the choice of vinyl, cotton or a special cooling material ensures the right comfort level and protection for the wearer.

Meets OSHA and ANSI Requirements

Bullard models S51, S61, and S71 conform to all OSHA and ANSI/ISEA Z89.1-2014, Type I, Class E & G requirements, including impact, penetration, and electrical insulation. The S51 also conforms to CSA Z94.1-2015. Bullard model S62 (vented) conforms to all ANSI/ISEA Z89.1-2014, Type I, Class C requirements, including impact and penetration.

Customization

Bullard uses state-of-the-art technology to imprint your company's logo or safety slogan. Whether the design is one color or six, it can be reproduced accurately, quickly, and inexpensively. Your company's logo can be printed in up to eight locations around the hard hat. Reflective or non-reflective stripes can also be applied to increase worker visibility. No other manufacturer offers a decoration program that is as easy, fast or reliable. Go to www.BuildYourBullard.com to customize your Bullard hard hat.

Suspension Choices

The Standard caps and hats offer Self-Sizing and Flex-Gear® ratchet suspension for added comfort.

Model S61 Pictured with Self-Sizing Suspension (RS4PP, RS4PC, & RS4PV)

1. Vertical Adjustments (two front and two rear)
2. Nylon Crown Straps
3. Large replaceable, absorbent Poly (RS4PP), Cotton (RS4PC), or Vinyl (RS4PV) brow pad with pillow cushions
4. Self-sizing pinlock

Model S71 Pictured with Flex-Gear® Ratchet Suspension (RS4RP, RS4RC, & RS4RB)

1. Vertical Adjustments (two front and two rear)
2. Nylon Crown Straps
3. Large replaceable, absorbent Poly (RS4RP), Cotton (RS4RC), or Vinyl (RS4RB) brow pad with pillow cushions
4. Cushioned Nape
5. Large, easy to turn ratchet knob
