G Series | Visual Hopper

BUNN

Fast, Precision Grinding

bunn.com/gvh

Reduces Need for Multiple Grinders

Chute accommodates nearly every size and shape of container for coffee grounds: funnels, large and small bags, cans, cups, and more – allowing one grinder to perform the job of multiple grinders

GVH-1 GVH-2 GVH-3

Flexible Options

Hoppers available in 1lb, 2lb, or 3lb options can be easily swapped to meet changing demands.

“No-click” Dial

Offers a custom feel and 340° of grind resolution. Choose from two decals: one with increasing size increments for upscale and specialty environments, and another icon-based design for grocery store applications.

Faster Grind Times

At 2 pounds per minute, the G Series grinds faster than similarly-priced competitors.

Bag Management

Bag clamp firmly holds onto small and large bags alike, eliminating the need for users to support their container while grinding.

Clear Hopper Showcases Beans

Hoppers are made out of a clear, BPA-free material that allows customers to see whole beans.

Precision Burrs

Reliably deliver the grind your customers are looking for.
