Meet the JDF

BUNN JDF cold beverage dispensers provide an ideal solution for serving a wide variety of cold beverages from concentrates for popular selections like juices, lemonades, iced teas, mocktails, and cold coffees.

The exclusive BUNN High Intensity® Mixing System assures perfectly prepared drinks.

Multiple merchandising options are available including the unique four and two segment graphic door models, as well as tap handle dispense models that allow the operator to easily change brightly lit door graphics and handles to promote new or limited time offerings.

Consistent Quality in the Cup

The viscosity or thickness of concentrates can vary widely. To ensure consistent results in every cup, BUNN has developed the High Intensity Mixing System which provides great-tasting, quality juices and other flavored beverages every time.

The concentrate is injected along with water under high pressure into the mixing chamber and is then thoroughly blended to create a quality-finished beverage.

This assures a high-quality, delicious beverage of ideal consistency from the top to the bottom of every glass.

Expanded Cold Drink Menu

Compact cold drink dispenser that delivers beverages from both frozen and ambient formats, maximizing profitability by providing a variety of products

Expand your cold beverage menu with juices, teas, mocktails, lemonades, and cold coffee beverages dispensed from JDF.

Exceptional User Experience

The JDF family has a variety of model options to provide exceptional user experience for consumers. Models with push and hold dispense buttons provide the ability to serve a variety of cup sizes. Models with portion control dispense buttons allow for serving portioned sizes to minimize waste and spillage, perfect for self-service operations.

LED backlit models illuminate brightly lit door graphics to promote new or limited time offerings. The JDF-4 Tap presents attractive styling with a removable graphic and tap handles, offering a canvas for marketing brands and products for a unique consumer experience.

Drink Output

2-head JDF dispensers deliver 85 drinks at a rate of 1-12oz drink per minute before exceeding 41F drink temperature (75F ambient incoming water w/ a 8lb ice bank)

4-head JDF dispensers deliver 145 drinks at a rate of 3-12oz drinks per minute before exceeding 41F drink temperature (75F ambient incoming water w/ a 16lb ice bank)

JDF-4 Tap

Function meets style with the JDF-4 Tap. Attractive styling with removable graphics and tap handles encourages customization and the flexibility to offer unique beverages.
