

MATERIAL SAFETY DATA SHEET

The information contained in this sheet is provided solely for the purpose of compliance with the Occupational Health and Safety Act and must not be used for any other purpose. At the time of preparation, this product did not contain any chemicals subject to reporting requirements under section 3/3 of the Superfund Amendments and Reauthorization Act (SARA) 1986 and Title 40 of the Code of Federal Regulations (CFR) Part 372.

Section 1 -Supplier

AEF Global Inc.
925 des Calfats Levis, QC,
G6Y 9E8

Tel.: 418-838-4441
info@aefglobal.com

Section 2 - Identification

Pheromone- Bait with pheromone for insect

Section 3 - Physical properties

Appearance:	Rubber capsule of various colors, plastic capsule, rubber band, polyester tube
Odor:	Slight
Boiling point:	Not determined
Pression of vapor:	Not determined
Density of vapor:	Not determined
Solubility in water:	Not determined
Density:	Not determined
Toxicity:	Not toxic
Other data:	Impregnated with less than 2 mg of active ingredient

Section 4 – Dangerous ingredients

Note: This product does not meet the definition of hazardous material set out in 29 CFR Part 1910.1200 (OSHA). The information in this SDS is for illustrative purposes only, as the product does not contain any toxic components.

Section 5 - Risk of fire and explosion

No object

Section 6 – Reactivity

Stability: Stable at normal pressure and temperatures. Does not present any risk of significant reactivity.

Incompatibility: None known, avoid strong oxidants

Polymerisation: Will not happen

Decomposition: Carbon monoxide formed by combustion

Section 7 - Spills, leaks and disposal

After their use, pheromone baits can be removed with ordinary waste and can be treated as non-toxic material. This product is not subject to any regulatory restrictions.

Section 8 – Special precautions for storage

Store in a cool, dry (short-term) place or in a freezer or refrigerator reserved for this purpose (for longer term storage).

Section 9 - Personal Protection Information

No special clothing is required to protect the skin. Avoid any contamination of the skin with the active ingredient. There is generally no possibility of direct contact with pheromones once they have been inserted into the bait. (It is suggested to wear a pair of latex gloves or use a pincette to handle the bait)

Section 10 – Health risks

Recommended exposure limits: Not determined

Effects of Acute Overexposure: May irritate eyes or skin, but there is no known applicable information on inhalation, ingestion or chronic and subchronic effects associated with overexposure. Pheromones are considered non-toxic.

THE STATEMENTS PRESENTED IN THIS MATERIAL SAFETY DATA SHEET ARE PROVIDED TO THE BEST OF OUR CAPACITY AND ARE CONSIDERED AS RELIABLE. THEY ARE, HOWEVER, PROVIDED WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, AND WE DISCLAIM ALL LIABILITY FOR LOSS, DAMAGE OR LIABILITY, DIRECT OR CONSEQUENTIAL, ARISING OUT OF THEIR USE.
