Built-in electronic thermostat

Electronic wall thermostat

(Not offered by Global Commander)

(Thermostat shown here as an example only)

IDEAL FOR

Office, bedroom, living room, kitchen, basement, entrance hall.

Convector

Watts	Heats an area of about ¹	
	sq. ft.	sq. m
500	50	4.65
1000	100	9.29
1500	150	13.94
2000	200	18.58

¹ Intended as a guide only. These calculations are based on a room with an 8 foot ceiling, R12 wall insulation and R20 ceiling insulation. The suggested heating capacity would then be able to keep the room temperature at 21 °C (70 °F) when the outdoor temperature is at -25 °C (-13 °F). The heating capacity required will vary depending on the area and volume of the room, the layout and orientation of the residence, its geographic location, type of construction, insulation and airtightness levels, as well as the size, type and orientation of the windows, etc.

Quiet unit

Easy to use

Sturdy construction
