

Beslut vid Forskningsnämndens sammanträde den 8 mars 2016

Postdoktortjänst

Det kom in 66 ansökningar till ”Postdoktortjänst”

Bifall:

Mercedes Herrera, Karolinska Institutet

Identification of clinically relevant functional subsets of cancer-associated fibroblasts in colorectal cancer.

Gottfrid Sjödahl, Lunds universitet

Molecular pathological and next-generation sequencing based taxonomy- and heterogeneity studies on bladder cancer.

Paulina Wanrooij, Umeå universitet

Mitochondrial DNA mutations, dNTPs and cancer.

Clotilde Wiel, Göteborgs universitet

Defining the Role of Antioxidants on Lung Cancer Progression and Metastasis

Reserv:

1. Srustidhar Das, Karolinska Institutet

Deciphering the role of regulatory T cells (Tregs) in colitis associated colorectal cancer (CAC).

2. Andrea Björkman, Karolinska Institutet

Functional insights and validation of candidate biomarkers of sensitivity or resistance to PARP-inhibitors within the ubiquitylation pathway.

Junior Investigator Award

Det kom in 48 ansökningar

Bifall:

Signe Borgquist, Lunds universitet

“PROTECT women by PREventiOn and early deTECTiOn of breast cancer - Interventional strategies for high risk populations”.

Martin Eklund, Karolinska institutet

Personalized prostate cancer diagnostics: Towards implementation of organized prostate cancer screening.

Marika Nestor, Uppsala universitet

Novel cancer targeting strategies to improve personalized cancer management.

Joan Yuan, Lunds universitet

Generation and regeneration of a diverse immune system in the fight against leukemia.

Reserv:

1. Helena Carén, Göteborgs universitet

Deciphering the role of the epigenome in tumour development, recurrence and therapeutic resistance.

Senior Investigator Award

Det kom in 10 ansökningar

Bifall:

Anna Dimberg, Uppsala universitet

The vasculature as a target for therapy in brain tumors.

Reserv:

1. Göran Jönsson, Lunds universitet

The molecular landscape of melanoma: elucidating the functional role of key players and identifying novel therapeutic targets.

Junior Clinical Investigator Award 50%

Det kom in 4 ansökningar

Bifall:

Johan Hartman, Karolinska Institutet

Deciphering endocrine resistance in breast cancers ex vivo.

Senior Clinical Investigator Award 50-70%

Det kom in 7 ansökningar

Bifall:

Patrick Micke, Uppsala universitet

Biomarkers and antigen targets in the immune landscape of NSCLC.
