The Offer - Brief Description

Public

A brief description of the offer that will be visible in search results (*plaintext and no more than 150 characters*).

A complementary discovery workshop and special discount pricing is being offered to all CAUDIT members based on a per FTE metric.

The Offer - Detailed Description

A more detailed description of the offer providing sufficient information for a member to identify if they have an interest.

Software 456 is a cloud-based enterprise planning and process automation platform designed to help organisations streamline and optimize their operations. It provides an integrated environment where core business functions—such as finance, procurement, human resources, and compliance—can be managed seamlessly from a single system. By automating workflows and reducing manual intervention, Software 456 improves efficiency, minimises errors, and enables real-time visibility into organizational performance. Its scalable architecture supports complex, multi-department processes while maintaining flexibility for future growth. With advanced analytics and reporting capabilities, the platform empowers decision-makers with actionable insights, ensuring alignment with strategic objectives and fostering a culture of data-driven decision-making. Built with robust security and compliance features, Software 456 delivers a trusted digital environment that enhances transparency, accountability, and operational resilience.

Special discount pricing is being offered to all CAUDIT members based on a per FTE metric. Software 456 is also offering a complementary discovery workshop to help members assess their individual institution needs.

Software 456 can be deployed in the cloud or on premise.

CAUDIT Top Ten

Please tell us how the products and/or services in your offer align to the CAUDIT Member priorities listed in the latest CAUDIT Top Ten .	
2025	
Topic Name	Please detail how the product/service aligns to this topic
Digital Strategy	Software 456's platform can connect with learning management systems, student information systems, and finance tools, creating a seamless digital ecosystem. Centralised data and analytics enable leadership to make informed decisions that support institutional goals like student success, research excellence, and financial sustainability.
Data Empowered Institutions	The platform consolidates operational data from multiple systems (finance, HR, procurement, student services) into a single source of truth. This enables advanced analytics and reporting, helping institutions identify trends, optimize resource allocation, and measure performance against strategic objectives.
Secure Digital Environment	Software 456 Implements encryption, secure authentication, and role-based access controls to safeguard sensitive student, staff, and financial data. Reduces risk of data breaches and ensures compliance with privacy regulations (e.g., GDPR, local education standards).
