**CAUDIT**

THE COUNCIL OF AUSTRALASIAN
UNIVERSITY DIRECTORS OF INFORMATION TECHNOLOGY

**PROFESSIONAL DEVELOPMENT
SHORT COURSE PROGRAM**

CLOUD: Strategy, Migration & Risk

at Australasian universities
and research organisations

CLOUD: Strategy, Migration & Risk

COURSE DURATION: 3 x 2hour two-way online sessions

ABOUT THE CLOUD WORKSHOP PACKAGE

Cloud in the higher education sector can be complex to justify and building a model that allows transparent decision making is key to its success. Having a transparent decision making model clearly articulates the value proposition to your organisation's cloud vision. Ensure that cloud benefits are realised and challenges mitigated and drive innovation by helping to deliver highly engaging digital transformation.

Each session will run for up to 2 hours and is being delivered as standalone instances with content supporting each of the topics but able to be consumed solo. For example, if you are interested in two of the sessions you can share you're the registration for the third workshop with a colleague.

Each workshop will be delivered via two-way online delivery mode allowing the presenter and you to communicate and gain a deeper level of comprehension.

Cost:
The cost of the Cloud Package is **$450** including GST. Unfortunately, individual sessions are not able to be purchased separately.

How to purchase the Cloud Workshop Package:
Purchase the Cloud Workshop Package using the link on the CAUDIT website. You will then receive a confirmation email which includes three individual session registration links where you can register yourself (or a colleague) for each individual session.

Session #1 **Cloud Overview: Model & Strategy**
- What is the cloud
- Cloud strategy
- Characteristics of cloud computing
- Deployment models
- Control of service models
- Cloud architecture
- Benefits/challenges

25
November
2021
1-3pm AEDT
