

SUPERCHARGE YOUR TALENT TEAM WITH AI

LET AI-POWERED TALENT TECHNOLOGY ANNIHILATE YOUR BIGGEST TALENT HEADACHES

The future of work has arrived, and it is AI-powered.

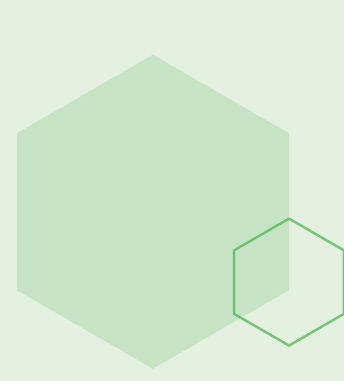

The world's fastest growing companies are using AI-powered Talent Intelligence to supercharge talent acquisition, talent management and workforce planning.

ACTIVATE YOUR TALENT INTELLIGENCE SUPERPOWERS

Supersonic Speeds

Reduce manual recruiting tasks by 90%. AI-powered résumé review and candidate search cuts through the clutter to deliver a clean, ranked slate of the best talent in a matter of seconds.

X-Ray Vision

Look past job titles and reveal every person's secret superpowers with skills- and capabilities-based hiring. Get access to their entire profile information inside your ATS.

Unparalleled Fairness

Let nothing, not even the most insidious forms of unconscious bias stand in your way! Skills-focused hiring, anonymizing tools and diversity filters keep your company OFCCP compliant!

Awesome Agility

Use our neural networks to give each recruiter instant subject matter expertise so they can pivot between roles and industries at the speed of light.

Replication

Find more of your star employees or dream candidates by using them as inputs for ideal candidate search models. With a few clicks, you can reveal a shortlist of people who match them in skill and experience.

Golden Touch

Unlock the full potential of every employee with internal mobility matching. Simply click a button to add them to your candidate slate and see how they compare to applicants and passively sourced candidates.

Teleportation

Setting up offices in new locations? Workforce Intelligence reveals which locations have the best local talent sources and connects you to your local star players.

Clairvoyance

Tap into the oracle that sees it all—from skills gaps to flight risks—with Workforce Intelligence.

ARE YOU READY TO SUPERCHARGE YOUR TALENT TEAM?

Censia Talent Intelligence is available to every single talent team on the planet, directly inside their ATS, HCMS, via API and in the cloud.
