Downloadable Product List for Chalmor's **eTRV+**
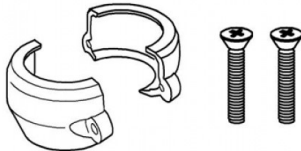

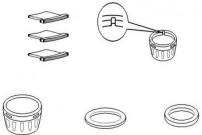

eTRV+

eTRV+ is an award winning, British made electronic thermostatic radiator valve. It fits directly to radiators in place of traditional TRV's, enabling automatic room by room heating control. It offers proven potential to cut energy bills by up to 30% by heating only the rooms you are using and preventing overheating. We can provide a huge range of adaptors to go with this product to ensure eTRV+ works with your system.

| Product Name	Image	Description	Product Code	Additional Information
eTRV+		eTRV+ electronic thermostatic radiator valve is a fully programmable radiator controller. Perfect for commercial applications, eTRV+ controls each radiator independently and offers realistic potential to cut up to 30% off your energy bill.	ETRV	View Datasheet View Instructions
eTRV+ Remote Control		Control and program your eTRV+. Must be within 6m of the eTRV+ unit.	ETRV/HS2	
PAIR Timer for eTRV+		PAIR (Passive Active Infra Red) is an occupancy sensor and timer which can be used with eTRV+ to enhance energy savings in areas with intermittent use. PAIR saves energy by lowering heating when a room is left empty.	PAIR	View Datasheet View Instructions
