Instructions for use:

For disinfection*: apply with a cloth over the surface to be disinfected, let the product stand as a function of the desired disinfection* purpose. Then, it can be left over until completely dried or wipe with a clean cloth. Regularly repeat the operation.

For cleaning and degreasing: apply with a cloth over the surface or the object to be cleaned/degreased, leave over a few minutes and then rub in.

In any case, a compatibility check with the substrate must be performed prior to any use. If the substrate is dedicated to be in contact with food or if the object can possibly be in contact with mouth, rinse with potable water.

Shelf life: 5 years

Precautions for use / Regulatory information:

Dangerous product according to Regulation 1272/2008/CE. Keep away from children.

Scrupulously observe the precautions for use and safety advices, and read the hazard information indicated on the label and/or the Safety Data Sheet.
