

Live Simulation 27/07/2017

Events

- Goalie change at the beginning must be Goalie in
- TAM 4:3 MAN in goal entries is strange, must be TAM – MAN 4:3 – also, it would be better readable, if the score in the goal entry is somehow separated from the text.
- Strange entries with double mentioning of goal such as “TAM Power Play **Goal** **Goal!** TAM 2:2 MAN”
- Space missing at “MAN Equal **StrengthExtra** Attacked Extra Attacked Goal! TAM 3:3 MAN”
- Shouldn't “short handed” be written with a hyphen (short-handed)?
- Replace “Extra Attacked” with “Extra attacker on ice”
- Entries are missing for: Game starts, 1st period starts, 1st period ends, 2nd period starts, 2nd period ends, 3rd period starts, 3rd period ends, overtime starts, overtime ends, shootout starts, game ends. -> there are entries for 1st period, 2nd period, 3rd period, but they do not declare enough (e.g. the fan will not know if the game is on break or there is simply no action at the end of a period).
- Please use full stops at the end of all entries. Currently some have, some not.
- App iOS: All events which are not goals have a break after the minute. Is it possible to have minute + time on the same line (same as on web)?

Other

- App iOS: Wrong time display (3' instead of 3:47)
- App iOS: Result in the header goes across logos

- Web: 0 attending at the beginning -> attendance figure should only be shown if a number is entered to the system
- Web: 1st goal came in, then disappeared, then came in again (first game we tested -> maybe a recording issue?)
- Statistics were not empty at game start (but we assume this has to do with the recording)

Questions

- Is it possible to link the player names in the lineups to the player cards?
