

# WORKSTORM™

Collaboration moving law firms forward.

# Law firms are changing how they work.

Each day you manage cases, strategize with colleagues, communicate with clients, edit documents, log billable hours, and update calendars. And all of these tasks usually occur in separate, unconnected systems.

It's time to transform the practice of law. It's time to integrate applications, workflows, business processes, and data streams. Workstorm is the all-in-one platform law firms need to collaborate securely, efficiently, and seamlessly.

# Spend more time focusing on your clients and your practice.

Time is money, and efficient communication benefits your firm's bottom line. Have time on your side with a collaboration platform that makes every minute even more valuable than before.

You can stop relying on email or exchanging countless voicemails to communicate with colleagues and clients. Share documents one-on-one or with an entire case team. Video conference with the click of a button. Workstorm gives your staff the tools they need to deliver the service your clients expect.

---

## Our philosophy.

Collaboration drives productivity. But only when it works. When wires get crossed, details go missing, and messages become cluttered, collaboration is counter-productive.

That's where Workstorm comes in. It's a customizable, enterprise-grade, platform that puts serious work above all else. Workstorm gives law firms the efficiency they need to do

more work in less time. It empowers practice groups through secure organization tools so that they'll never miss a critical case component. Safe, scalable, and simple.

Because after all, work takes collaboration. But collaboration shouldn't take work. Don't just wait for inspiration to strike.

**Create a Workstorm.**

# Collaboration software for the modern law firm.

Workstorm is a one-stop, user-friendly platform that combines all forms of communication including: email, video chat, screen sharing, and file sharing to name a few. So details are never missed, wires are never crossed, and everyone stays on the same page.

## All-in-one communications platform

## Work takes collaboration. But collaboration shouldn't take work.

### Collaborate productively.

Workstorm provides uninterrupted productivity through secure, "always on" messaging connections, document sharing, and video conferencing features available on desktop or mobile devices.

### Control you can count on.

Workstorm provides greater control and analytics, with simple data analysis to better understand your firm's engagement on the platform, as well as the important information that you need to drive your practice and increase firm profitability.

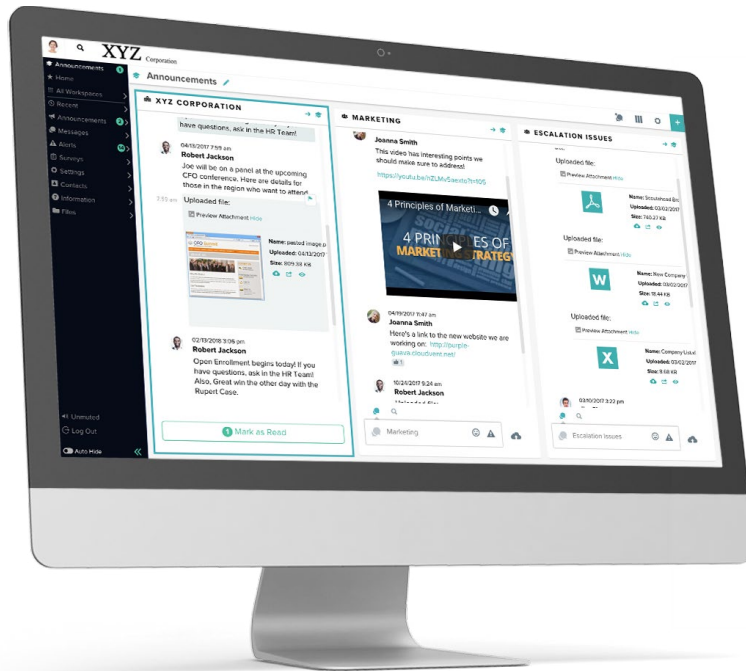

### Secure the confidential.

All of Workstorm's messaging services are securely encrypted, and all shared information can be controlled via your custom security policies. Keep team conversations private, share files only with authorized personnel, set password parameters, and enable single sign-on.

### Take your practice everywhere you go.

Workstorm improves teamwork and coordination on matters across all members of the legal team, including outside counsel and experts, no matter the geography.

# Ready to get to work?
