

NEW Major!

Bachelor of Science in Construction Management

- *Are you looking for a fantastic and exciting career in construction with high paying jobs waiting on you when you graduate?*
- *Want to work in the engineering field without the rigor of being an engineer?*
- *Do you like to work with your hands?*
- *Do you like being outside?*

If so, our new full fledged Bachelor of Science in Construction might be just what you are looking for. While CBU has offered a concentration in this field for the last 5 years, starting in 2023, we will welcome our first cohort of students on campus.

Housed within the Civil and Environmental Department, our new Construction Management program will be the first and only one like it in the Memphis area, and with great relationships with many of the big construction companies in town, there are plenty of opportunities for students to earn hands on experience and learn from the pros.

Graduates of the Construction Management program are prepared to work in many different environments where management contributes to the success of construction projects. You'll be prepared for a career as a:

- Project manager
- Field Superintendent
- Estimator
- Planning and Scheduling
