

Let Us Help You Transition Home Safely

A safe transition home is the first step to a successful, complete recovery.

Comfort Keepers® Transition Services

For more than 15 years, Comfort Keepers has helped people transition safely and happily home after treatment at a medical facility.

Being discharged after a hospital or other medical facility stay does not mean your recovery is complete. Patients often have ongoing care needs until they have fully recovered. From short-term support during the transition home to ongoing care to help ensure you are not readmitted to the hospital or other facility, Comfort Keepers will provide customized care.

Comfort Keepers provides the following services and more to help ensure a safe, happy transition:

- transportation home or to the final destination
- home assessment to ensure a safe environment
- prescription pickup
- reminders to stay compliant with the care plan
- healthy meal preparation and other help around the house
- transportation to follow-up appointments

Critical Timeframes to Make a Successful Transition Home

4 Hours

Safe Transition Home

Trained caregivers, the special people we call *Comfort Keepers*®, transport clients from the medical facility to home or the final destination, and help them get settled.

48 Hours

Reinforce Care Plan

During this critical time, the *Comfort Keeper* alleviates stress by picking up prescriptions, reinforcing doctor's orders and providing emotional support.

7 Days

Ongoing Care

As clients recover, the *Comfort Keeper* provides assistance with tasks such as healthy meal preparation, bathing, dressing, and medication reminders.

30 Days

Continued Support

Ongoing support can reduce the risk of hospital readmission for adults with chronic medical conditions and complex needs.

Specialized Care

Comfort Keepers are specially trained to care for clients with congestive heart failure, acute myocardial infarction (heart attack), and pneumonia. They ensure clients follow special diets, complete rehabilitative activities, and take medication.
