Technology Solutions: Keeping Seniors Safe At Home

KEEPING THE COMFORTS OF HOME™

SafetyChoice® – The Perfect Complement To In-Home Care Services

All seniors want to live independently in their own homes, but nothing is more important than their safety.

Whether aiding in response to an emergency or delivering helpful medication reminders, *SafetyChoice*® in-home care technology solutions ensures help is always at hand. When combined with in-home care services, *SafetyChoice* provides around-the-clock monitoring so you know help is always available.

Alert is available in wristband, pendant or belt clip styles.

G2000

SafetyChoice® Suite Of Technology Solutions

The *SafetyChoice*® Personal Emergency Response System (PERS) ensures help is always on-call. With a simple push of a button, a response professional at the Centralized Monitoring Station (CMS) will answer the client through the two-way PERS. The response professional will then dispatch the appropriate help—an ambulance, neighbor, family member or friend.

SafetyChoice PERS

The traditional *SafetyChoice* G2000 PERS is a tabletop console that allows the client access to our 24-hour Centralized Monitoring Station (CMS). Also available are the Home and Yard PERS LM5000 and the compact G4000.

LM5000

G4000

Wireless PERS With GSM Cellular Technology

This device offers cellular connectivity for those who no longer have a landline.

Medication Solutions

The *SafetyChoice* TabSafe Medication System offers a safe and affordable way to ensure the right dose of medication is delivered at the right time.

Around-The-Clock Monitoring

The *SafetyChoice* Centralized Monitoring Station (CMS) never sleeps. Our caring professionals are ready 24-hours a day to respond to alarms received through our clients' in-home technology devices. State-of-the-art technology provides our responders access to detailed information to inform emergency responders about clients' medical conditions and preferences. Ours is one of the few alarm monitoring companies to be rated and approved by Underwriters' Laboratories and Factory Mutual.

ACCESSORIES

Enhance The Effectiveness Of Your PERS For An Added Degree Of Home Safety

Door and Window Contacts

Programmable motion detectors or sensors signal when a door or window is opened.

Help Button

For individuals with mobility or strength restrictive issues, this larger water-resistant pendant can be wall-mounted or attached to clothing.

Wireless Camera

This camera allows secure, password-protected access to live video of an individual via an Internet connection.

Pressure Sensitive Floor Mats

Wireless floor mats, ideal for those with dementia or risk of falling, send an alarm to the CMS.

Smoke and CO² Detectors*

These detectors signal the CMS to dispatch the local fire department.

*Not available in all states.
