**Cloudinary Media Experience Cloud for composable architectures**

A headless, AI-powered media platform for creating and delivering visual experiences everywhere.

**Visual experiences drive today’s economy**

Brands that survive and thrive invariably deliver visually rich experiences that are fast, immersive, and consistent at ever-multiplying touchpoints.

Since managing the sheer volume of visual media required to achieve that is humanly impossible, an intelligently automated, purpose-built solution that seamlessly integrates with your existing and evolving tech stack is the only path forward.

Cloudinary’s content-aware, AI-powered solutions for the rich-media lifecycle free up your teams to focus on creating captivating experiences. Our SaaS, API-first, microservices-based approach ensures that developers have everything they need to manage, optimize, and deliver rich media—at scale.

Thus, companies that adopt Cloudinary’s content-aware, modern Media Experience Cloud are equipped to innovate faster, pivot when disruption occurs, and scale when opportunities arise. You can get started on this end-to-end platform for managing and delivering rich media quickly without a significant lift.

**A modern approach for building visual experiences**

The Cloudinary Media Experience Cloud supports dynamic real-time transformations of images and videos, which are then delivered automatically in the right format, size, and weight for all experience types with intelligent content awareness.

**Media-centricity**

Cloudinary’s extensive rich-media expertise and focus empowers better visual experiences everywhere.

**Intelligent Automation**

Automation and AI throughout the visual-media lifecycle accelerates time to market across all channels.

**Flexible Architecture**

A composable platform easily integrates with DX solutions to fast-track digital transformation.
Media-centricity

- Support for all formats of key, cutting-edge and emerging media (360, 3D, metaverse) at all times with no heavy lift.
- Grant teams centralized access to rich media assets across applications to accelerate product launches.
- Bring products and experiences to market faster by means of robust APIs developed by media experts for the entire media lifecycle.
- More efficiently manage the lifecycle of media assets with a purpose-built and intelligent content-aware solution.

Intelligent automation

- Provide engaging, personalized, and optimized experiences everywhere through automation.
- Innovate faster with an extensible, intelligent framework trained on the largest set of media data in the industry.
- Deliver the highest-fidelity and best-performing visual experiences, automatically optimized for fast loads on all channels, devices, and browsers.
- Offer picture-perfect visual experiences in real time with content-aware transformations that automatically identify focus areas of images and videos.

Flexible architecture

- Incorporate visual-media management into a best-of-breed composable stack through robust APIs.
- Enable developers to quickly create engaging experiences by means of API-based management techniques for rich media.
- Unify your media asset library across all content systems for faster team collaboration with a headless DAM.
- Integrate with existing or evolving tech stacks seamlessly and easily with an extensive set of prebuilt integrations, SDKs, and widgets.

Modern Media Management

Our next-generation, media-as-a-service, composable technology serves as a springboard for fast product launches by being:

**Scalable**
Manage, customize, and optimize massive media collections seamlessly with a SaaS and intelligently automated rich-media solution.

**Flexible**
Bring innovations to market fast and respond swiftly to market shifts with a composable and microservices-based approach.

**Extensible**
Easily integrate with your existing and evolving tech stack using an extensive set of prebuilt integrations, SDKs, and widgets.

**Developer-first**
Enable developers to quickly create engaging experiences in their language of choice with API-based rich media management.

**Best-of-breed**
Accelerate product and user-experience development by adopting a proven media-experience platform for visual-media requirements.

**MACH certified**
Leverage ecosystem technology with certified membership of the MACH Alliance.
The MACH Alliance presents and advocates for an open, best-of-breed enterprise technology ecosystem that is microservices based, API-first, cloud-native SaaS, and headless.

Enterprise suites are no longer “the safer choice”—the MACH ecosystem is. It is agile, and nimble, and always up to date.

Cloudinary is a proud certified member of the MACH Alliance.
