**PREMIUM TILT & TURN WINDOWS & DOORS**

# About Us

## 3 Euro Windows

*Our Goal:*

**To deliver the highest quality of products that exceed every expectation.**

*Why?:*

A high quality window should last at least two decades, but today, the average homeowner replaces their windows every 7-8 years. We asked ourselves, why is this happening and what can we do to fix it? What we found is that the North American market is heavily focused on mass producing products that value profit margins over quality.

To us, this is unacceptable, which is why 3 Euro Windows takes a consumer focused approach in everything we do. Our products are designed with your needs in mind, and we will continue to push the boundaries of what is possible in window innovation.

**BATTLE TESTED:**

Sourced from a highly reputable European manufacturer with 25 years of experience.

**INNOVATIVE DESIGN:**

Modern construction that not only looks great, but also saves you money on your heating bill.

**PERSONAL:**

Leave the limitations of traditional windows in the past. Make your house a home with many options to choose from.

# Our History

## 3 Euro Windows was born out of necessity to fill a gap in the North American market

### *Our Story:*

In the summer of 2016, working as the project coordinator for a residential property, Alex Budure was tasked with sourcing large, high quality, and energy efficient windows that would fit the aesthetics of the modern build. He quickly learned that it would be nearly impossible to do that in Canada without exceeding the client's budget, or compromising on quality.

With no good options on the market, Alex decided to go to Europe with the intention of finding the perfect supplier that could meet the high requirements of this project. After some time, he found exactly what he was looking for in Timisoara, Romania – a veteran window manufacturer that shared his values (Lipoplast).

After completing the project under budget and exceeding his customer's expectations, the idea for 3 Euro Windows was born. If Alex was struggling with finding high quality windows, it means that others were too.

A year later, 3 Euro Windows attended the Toronto Building Show with a small (but superior) selection of windows, to validate our vision. The response was positively overwhelming, and we instantly knew that we were on to something. While our catalog selection has expanded, our goal remains the same: deliver the highest quality of windows and doors, and continue to exceed every expectation.

# Manufacturing

*Sourcing:*

**3 Euro Windows is the exclusive distributor of Lipoplast products in North America. Lipoplast has been producing the highest quality of tilt and turn windows since 1994, and we can't wait for you to experience the difference.**

*Summary:*

All of our innovative products originate from a manufacturing facility in Timisoara, Romania, where a team of more than 200 continues to push the boundaries of what's possible.

We pride ourselves on the quality of our products and refuse to settle for anything but the best. Our primary goal is source products that you will love, without breaking the bank.

**SUPPLIER:**

LIPOPLAST

**PRODUCTION:**

4 dedicated facilities for PVC frames, insulated glass, tempered glass, and coloured PVC profiles

**FACILITY:**

430,000 ft<sup>2</sup>, with 130,000 ft<sup>2</sup> dedicated to production

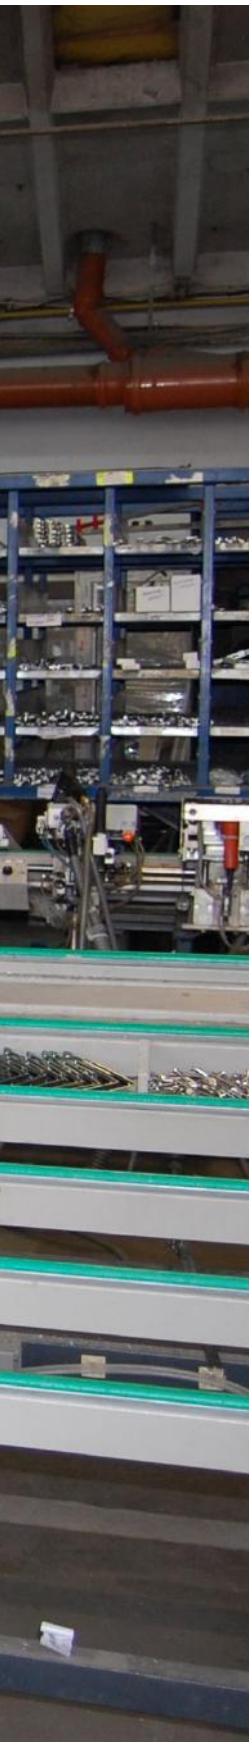

We're deeply invested in people and technology in order to deliver a quality of windows and doors that will exceed your expectations.

Designed with longevity in mind, our windows will remain impenetrable to cold, noise, and humidity and will be as easy to maintain as the day you bought them.

# Windows

# Tilt and Turn Windows

**Due to its many improvements over the traditional window, the tilt and turn design is the gold standard in Europe.**

## *Summary:*

The clever tilt and turn design offers an attractive view when shut, draft-free ventilation through the top when placed in the "tilt" position, and the traditional wide open in-swing experience in the "turn" position.

When it comes to energy efficiency, the innovative tilt and turn design is second to none. Each window we sell, consists of three glass panes separated by two chambers of air to reduce the amount of heat transfer prevalent in single-pane designs.

Due to their slender profile sight lines and small construction depth, our 76mm window systems are ideal for both new buildings, and renovations.

## **SOUND DAMPENING**

All windows come standard with multiple interior chambers and extra wall thickness to keep sound transmission to a minimum.

## **SAFE AND SECURE**

Our windows can withstand the harshest of weather conditions, and with the multiple locking points they're much more secure than the traditional design.

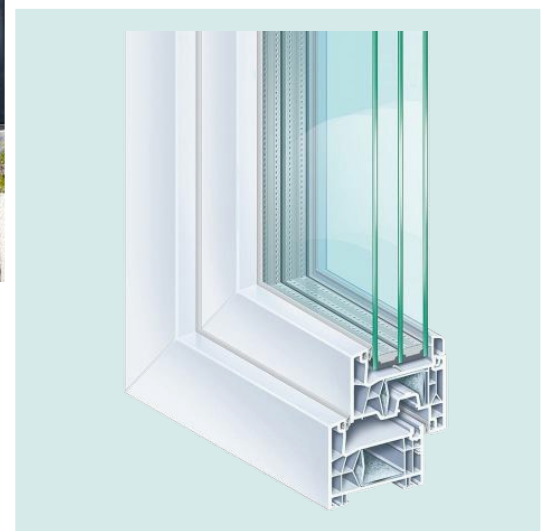

## **CUSTOMIZABLE**

Our selection of profiles and customization options allows you to configure a window thats perfect for your home.

## PERFORMANCE 76

This double seal system with five chambers and 76 mm construction depth offers a fascinating combination of modern design and perfect profile proportions.

### Why PERFORMANCE 76?

The way we incorporate windows into our homes is changing, as we continue to make strides towards improved performance, energy efficiency, and sound reduction.

Our Performance 76 system brings the latest in European window technology to North America. The unique tilt & turn design of our windows offers improvements in both functionality and performance. While there's no question that these windows look good, you can rest assured that they're also incredibly reliable and long lasting.

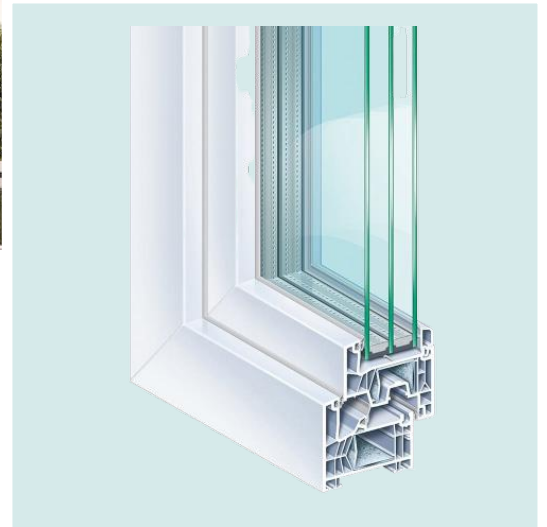

The design of the Performance 76 system extends past the beautiful vinyl profile, to the safe and precise multi-point locking mechanisms in its frame and handles. So whether you're an architect, builder, or home owner, we're confident that the Performance 76 system is an obvious choice for you.

## PREMIER 76

In addition to the inner and outer weather seals, the PREMIER 76 window features a third center seal designed to improve thermal and sound insulation.

### Above and beyond

The Premier 76 line up offers a slight upgrade to the Performance 76 system. Though both windows have a 76mm (3 inch) construction depth, the Premier 76 features a center seal for additional thermal insulation.

Both of these high quality windows can be configured to your personal specification, with dozens of options to choose from when it comes to glass finishes, frame colours, handles, and more. We're excited to learn about your needs, and we're confident that we have a solution that's right for your project.

# Versatile

**3 Euro Windows offer a modern design that will let you express your personal sense of style. Our doors are available in multiple configurations and are built with longevity and security in mind.**

## **ENERGY EFFICIENT:**

The unique sealing system used in our doors allows you to save on your heating bill.

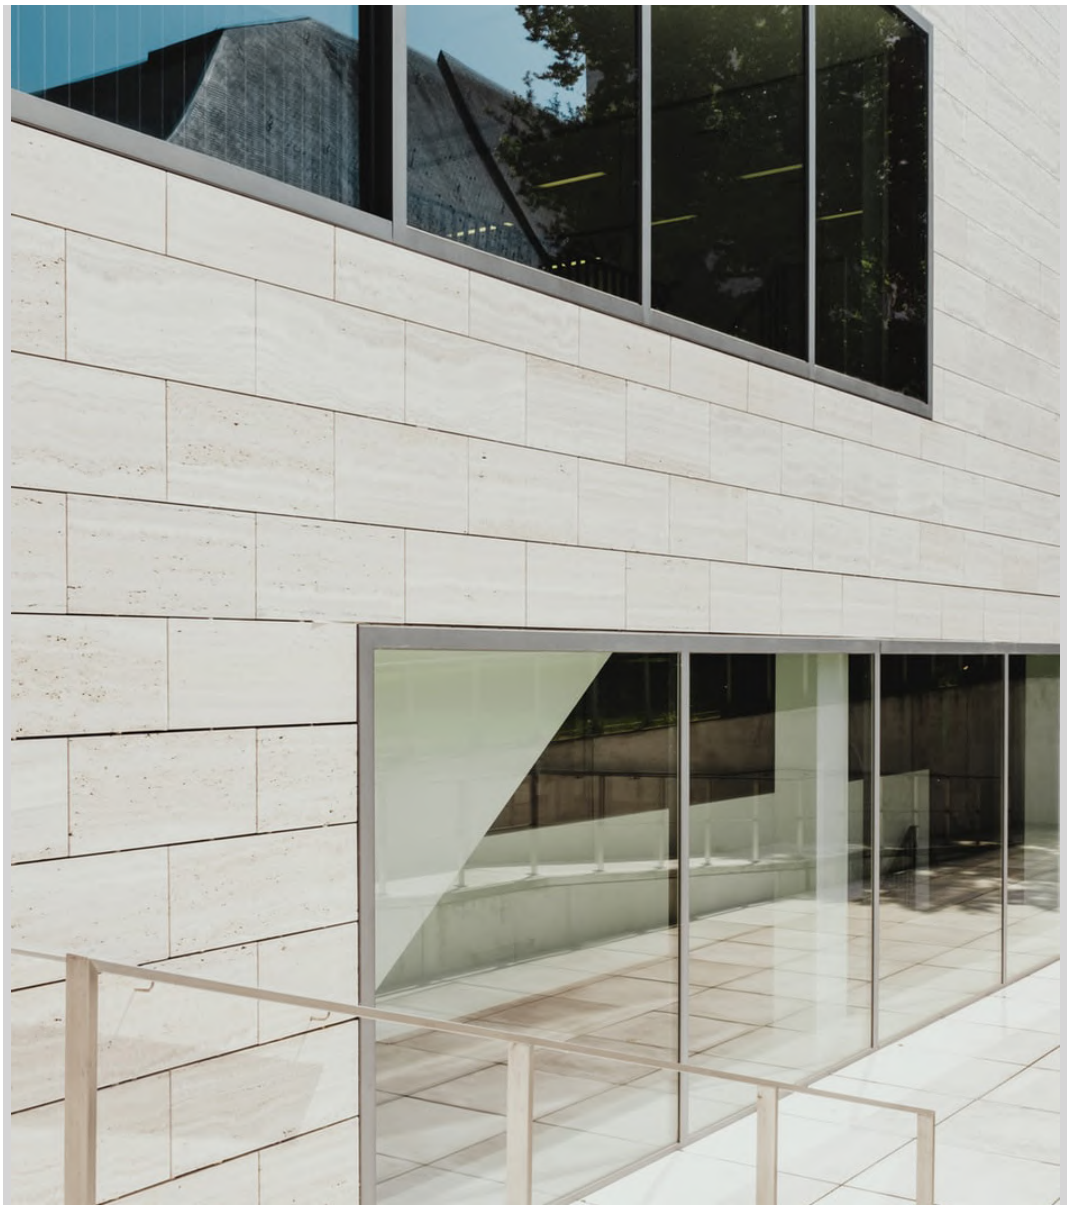

## **SAFE AND SECURE**

Our windows can withstand the harshest of weather conditions, and with the multiple locking points they're much more secure than the traditional design.

## **REINFORCED**

Our selection of profiles and customization options allows you to configure a window thats perfect for your home.

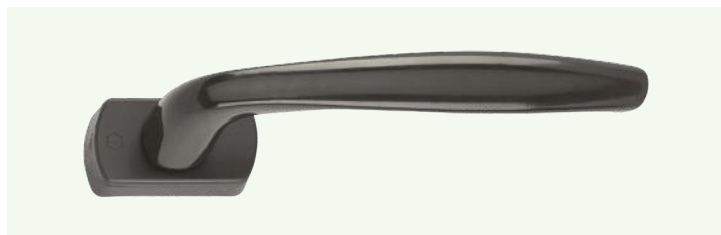

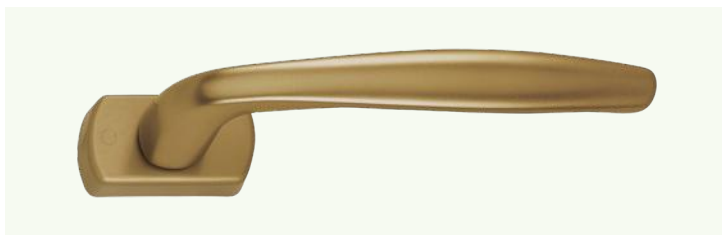

# Handles

**Find the perfect pairing to any window with many handles to chose from**

*Summary:*

Find the perfect match for any window in many of our handle options (most popular of which are listed below). Aside from showing off your unique style, our handles are designed with your security in mind. Each handle come standard with a patented locking mechanism, which prevents it from being handled from the outside. The precision click that is clearly heard while handling, indicates that your window has been securely locked.

**Doors**

# Sliding Doors

**Designed to fit your needs, our modern sliding doors offer not only superior views, but also unmatched security and performance.**

*Summary:*

With 3 Euro Windows doors you get to enjoy more of your views, without needing to sacrifice security, or energy efficiency.

Our sliding doors are the ideal choice for anyone looking to transform their home. The large scale doors can be produced in any size, using a single, uncut piece of glass.

When closed, our large-scale sliding doors blend in perfectly into their surroundings by becoming completely flush with the wall.

**TILT & SLIDE**

Similar to our windows, our doors are designed to open in two unique ways.

**EASY SLIDE**

Engineered for an effortless slide, our doors come standard with a sliding mechanism that reduces friction.

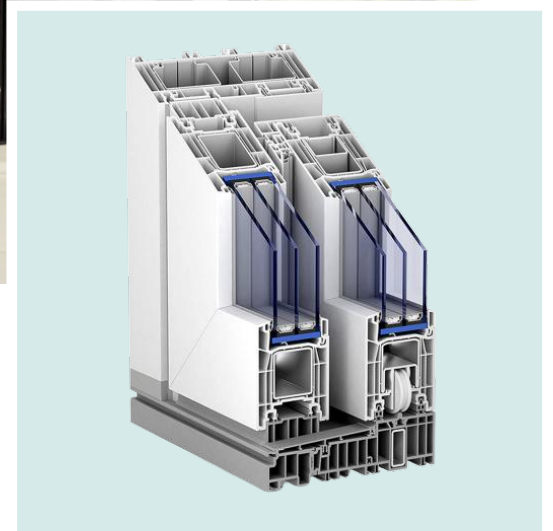

**CUSTOMIZABLE**

Our selection of profiles and customization options allows you to configure a door thats perfect for your home.

## PREMIDOOR 76

Timelessly elegant, the Premidoor 76 system is designed with your ultimate comfort in mind.

### Don't settle for average

Premidoor 76 is a 76mm system with the same advanced 5 chamber technology used in our line up of windows. The unique design offers unmatched energy efficiency and security. The ultra modern design uses straight lines to create a profile suitable for every interior.

The Premidoor system can be configured with glazing options up to 50mm thick, which offers incredible sound insulation upwards of 47dB.

And of course, like all of our products, the Premidoor line up is completely customizable to fit your own personal needs. Choose from dozens of glass finishes, casings, and frames to create a door that's perfect for your space.

## PREMILINE

Designed for longevity and minimized wear, the high quality construction of the Premiline system is sure to last a long time.

### Feel the comfort with every interaction

It's truly difficult to describe the experience of a Premiline door. Engineered with incredible precision, the slide of the panel on high quality stainless steel tracks is virtually weightless, nearly silent, and astonishingly smooth. Simply put, it's like nothing you've experienced before.

We understand that sliding doors are a cornerstone component of any room they occupy, which is why our doors are designed with elegant profiles that blend in. Available in nearly any size, our Premiline doors are a perfect way to take in those views.

Similarly to the Premidoor 76, the Premiline selection also offers a vast array of configuration options, including a range of frames, glass finishes, and casings. Regardless of your personal needs, you won't go wrong with our Premiline system.

# Front Entry Doors

**3 Euro Window doors offer a modern design that will let you express your personal sense of style. Our doors are available in multiple configurations and are built with longevity and security in mind.**

**SUPERIOR SECURITY:**

Our doors are designed with safety in mind. Multiple locking points along the frame gives additional peace of mind that your home is safe and secure.

**ENERGY EFFICIENT**

Designed to limit the air transfer from and to the outdoors.

**PERSONAL**

Your only limit is your imagination. Let us help you find the perfect door for your home.

Our front entry doors are not only safe and personal, but they're also incredibly energy efficient. Designed and manufactured with the same high quality glass as our windows, these doors are built to reduce heat loss, by limiting the amount of air that can enter or escape the house. And with the dozens of configurations available, you can be sure that your new door will match any exterior, and bring a splash of European luxury to your home.

# Options

# Colour Options

**With 3 Euro Windows, you're not limited when it comes to expression of your personal style.**

*Summary:*

We offer many colour configuration options for our window and door frames, most popular of which are listed on this page.

All of our windows come standard with the choice of either an outside or inside colour foil, or a combination of both. Simply choose what you like best, and let us do the rest.

Difficult to soil and easy to clean, the colour foils protect the profiles from the weather using the "Cool Colors" technology. With this innovation, not even the hottest of summers or the harshest of winters will cause any damage.

Represent a problem, as the reflection of radiations from the IR close spectrum is 4 times higher than an equivalent normal foil.

## **RESILIENT TO THE ENVIRONMENT**

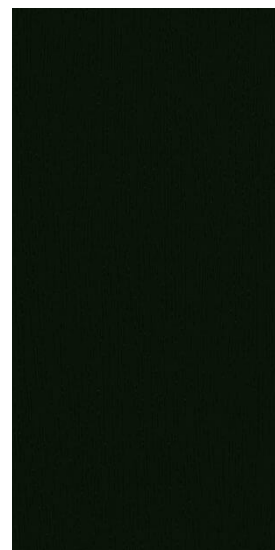

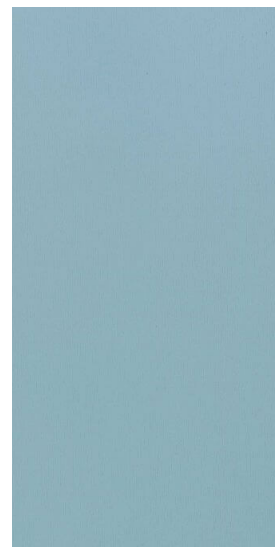

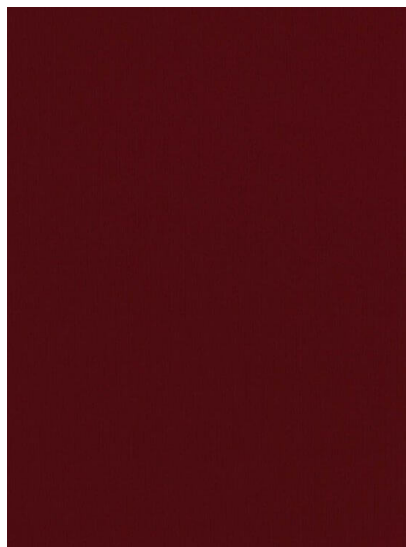

Engineered to withstand the effects of both ultraviolet and infrared rays, 3 Euro Windows will look like new for years to come.

## **LONG LASTING**

Designed with longevity in mind, 3 Euro Window colour foils are 4 times more resistant to IR radiation.

## **UNIQUE AND PERSONAL**

Whether you're going for a traditional look, or for something completely different from the norm, we got you covered.

# Decorative Glass

**You don't need to choose between form and function. With 3 Euro Windows, you can have both.**

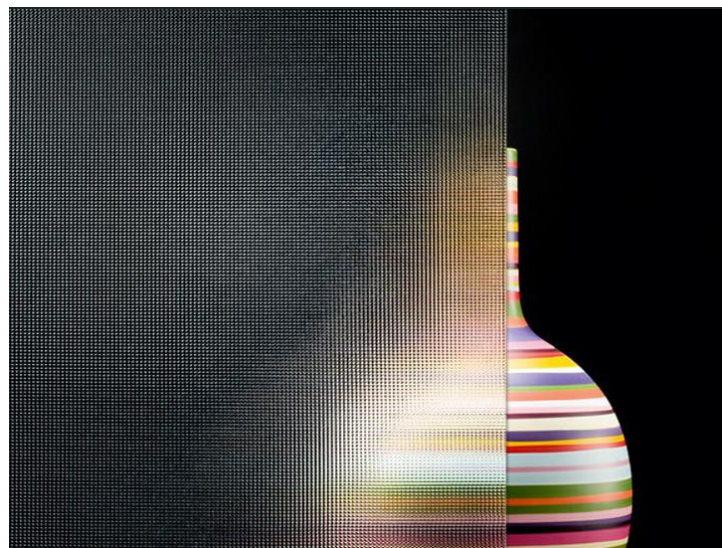

*Summary:*

Go one step beyond selecting a foil colour and create a unique ambiance in your home by opting for decorative glass.

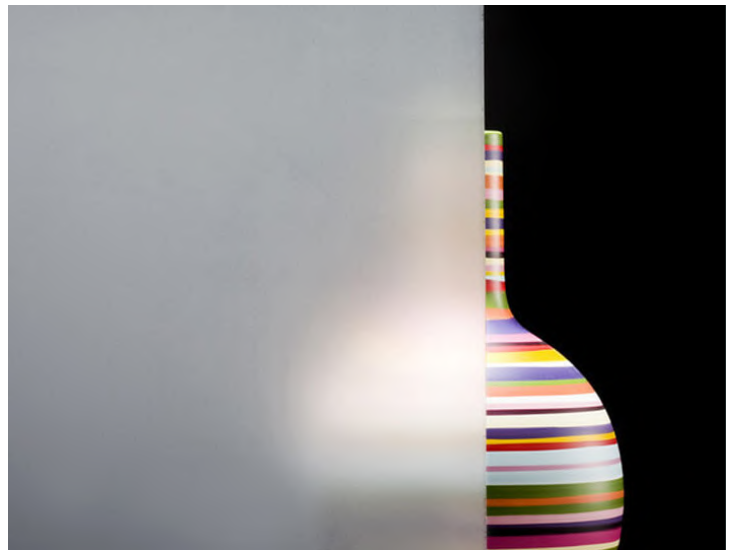

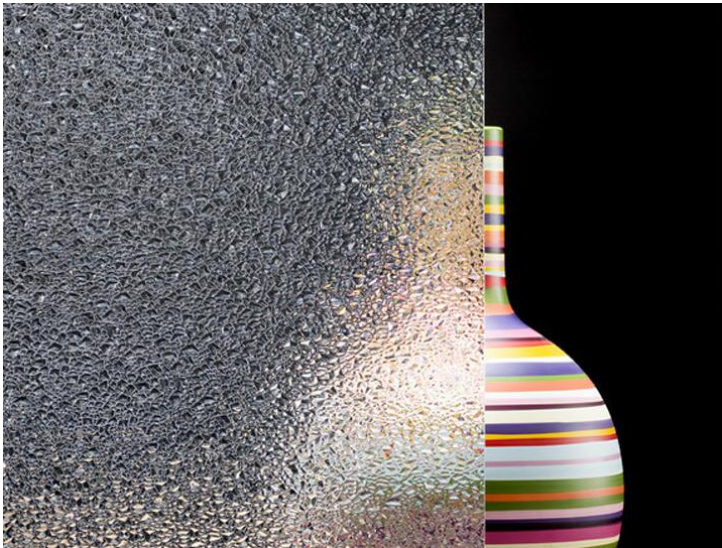

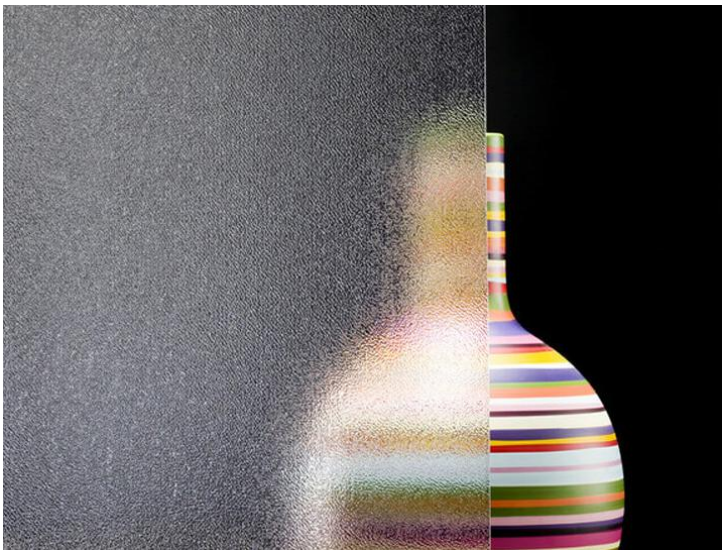

The glass used in our windows and doors is sourced from high quality suppliers. Every pane is processed on a completely automatic assembly line, which enables us to reach a production capacity of more than 1,500 panes per day.

Each pane that ends up being used in one of our windows or doors also meets (and often exceeds) the requirements in regards to safety, insulation, and environmental footprint.

Available for both- our windows and doors, our selection of glass options is perfect for anyone looking to spice things up. Whether you're looking for more privacy, or simply want something different, 3 Euro Windows makes finding the perfect door or window incredibly easy.
