

Write to Joshua Robert Swann for access to the booking calendars of each area!

Don't use this door, for now. Enter through Hone lab main entrance!

Sign in to the lab.

PPE will be provided here. Is mandatory in the lab!

Leave all packages to the Deanlab here. Communicate (Slack/email) if you go pick up packages, and volunteer to bring back any for the group.

Research Areas:

1. Blue sapphire zone (Fume hoods, exfoliation areas A & C, Nikon1, spinner)
2. Red ruby zone (exfoliation B, Nikon2, Janis)
3. Green emerald zone (Probestation, wirebonder, stereoviewer)
4. Pink zone (Oxford He3)
5. Yellow canary zone (Oxford DryCry)
6. Burgundy zone (PC stacker, vacuum annealer)
7. White diamond zone (PPC stacker)
8. Purple zone (AFM)

Communication is key!

If someone booked the **red** area for some hours, but you need to spin a chip – talk to the current user.

“Hey can I spend 10 minutes spinning my chips next time you need a break?”

Team up!

Team up to get work done. If you're going to the cleanroom, e.g. to etch or deposit metals, you **MUST** write out and offer your assistance in **reasonable** time beforehand.

Adjusting to a new normal

All of this is subject to change – let us know what works and what doesn't.

To make any of this work, we need team effort, solidarity, and adjusting to a “new normal”.

If you feel you have to bend or break the rules to get work done, you're putting yourself, everyone you work with, and their social circle, at risk!

Talk to the group instead, and we can discuss safe ways to get the job done!

Package deliveries are open again!

Att: Name / Department
