

Rules and regulations

When creating a contest, it's a good practice to add rules and regulations to let participants know how long the contest will last, what prizes will be drawn, what are the eligibility constraints and many other details.

We recommend that you write all these rules in a Word document and that you convert it into a PDF file. You will then need to upload the PDF in the Introduction or Footer Text of your contest from the Configuration section.

Select the text that will link to your PDF and click the Upload File icon.

You can either drag and drop the file or select it from your drive. Hit the Save button and that's it! Participants can now click the link and the PDF file containing the rules will open in a new browser tab.
