

Innovation is our passion.

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma and academia. This expertise and experience provided the fundament for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy.

Continuing steadily on our sustainable innovation path and growth journey, we are looking for a

Application Support Engineer

for **Lucillus®**, our process information management system for bioprocess development.

Your responsibilities will include but they won't be limited to the installation and basic configuration of our software applications on site or by remote access to Linux and Windows. You coordinate with the customer and responsible stakeholders for the respective IT infrastructure (OS/Networking/Database) all the necessary steps to deliver installations. You plan and perform software updates for our customers and handle 2nd level support issues using our ticketing system (incl. triage). You support our tests department in the verification of installations and update of procedures.

- Successfully completed apprenticeship as a computer scientist or an equivalent IT education and several years of working experience.
- You feel at ease with administrative tasks on different OS (Linux, Windows).
- Preferably you have some experience in basic database administration.
- You are willing to embrace travel activities of 10-20% (Europe, North America, Asia)
- You like to work independently and use your strong problem-solving abilities in a goal-oriented way while collaborating and communicating well in international and multicultural settings.
- Experience in (bio)process technology is a plus; however, it is not a prerequisite.

Our offer

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues and a true purpose. We are looking forward to hearing from you!
