

Innovation is our passion.

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient, and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment, and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the fundament for the technology transfer into the medtech space and the development of Seraccess, a truly disruptive diabetes therapy.

Continuing steadily on our sustainable innovation path and growth journey, we are looking for a

Software Engineer C++

for Lucullus[®], our process information management system for bioprocess development.

Our software engineers develop next-generation technologies that change how biopharma digitizes and automates bioprocess development to fulfill its purpose and bring highly demanded new medications to patients. Lucullus[®] is constantly being developed as it needs to handle different kinds of information from innumerable sources within highly complex and constantly evolving environments. Our vision is to maintain this leading position and stand out significantly from all other bioprocess software applications.

We are looking for

Engineers who bring fresh ideas from all areas enabling us to access new fields. As a software engineer, you will collaborate with your colleagues in specific projects as we push our technology forward. You are an all-rounder who is familiar with the development of backends, networking, databases, business logic and UI front ends. Furthermore, you will handle 3rd level support issues for our customers. You find inspiration in directly interacting with customers' specific applications and equipment to meet their unique needs in workflow optimization. You are open minded, versatile, enthusiastic to take on new challenges across the board and driven to make a difference.

Your profile

- Graduate in computer science or an equivalent IT education
- Programming in C/C++, several years of professional experience
- Knowledge of automation / communication protocols advantageous (e.g. OPC, Modbus)
- Preferably you have experience with Qt, Python, SQL and Oracle databases
- Experience with (bio-)process engineering is an advantage, but not a prerequisite
- Operating system knowledge of Windows and Linux
- Experience with the Atlassian tool suite is highly welcomed
- You like to work independently and use your strong problem-solving abilities in a goal-oriented way while collaborating and communicating well in international and intercultural settings - English is required, German is a plus

Our offer

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!

Please submit your application with a detailed curriculum vitae to hr@securecell.ch
