

Innovation is our passion.

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient, and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment, and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the fundament for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy.

Continuing steadily on our sustainable innovation path and growth journey, we are looking for a

Scientific Intern

To contribute to Biotech and MedTech processes.

Your mission is to work with members of the Securecell Department of Science and Testing to advance our development efforts in innovative biotech and/or MedTech process technologies.

Specific job responsibilities will include:

- Reviewing scientific and industry literature, understanding this material and presenting findings
- Planning and executing scientific lab experiments, potentially working with laboratory automation software
- Documenting all work as well as presenting quality data analysis and conclusions in professional reports
- Supporting lab activities including ordering materials, processing associated paperwork and lab cleaning tasks

Required / preferred qualifications and characteristics

- Current Bachelor's or Master's degree student in a relevant scientific, engineering or medical discipline
- Detail-oriented personality capable of producing high quality work and documentation
- Some experience working in a scientific laboratory, planning scientific experiments and writing professional reports
- Uncompromising ethical standards
- Good verbal and written communication skills in English (incl. scientific writing)
- Passion in Biotech and Medtech process technology and in scientific research is a plus.

Commented [A1]: Here I would change to good

Our offer

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!
