

**BLUE CHEM IS A REFERENCE OPERATOR IN THE PRODUCTION AND DISTRIBUTION OF ADBLUE®**

**ABOUT BLUE CHEM**

Created in Portugal in 2011, Blue Chem is dedicated to the production and distribution of AdBlue®, a chemical product complementary to fuel and used in diesel vehicles equipped with SCR (Selective Catalytic Reduction) technology. Licensed as an official producer of AdBlue® – product approved by the Verband der Automobilindustrie e. V. (VDA). – Blue Chem operates in several activity areas: transport, industrial, maritime and agricultural sectors.

The company's growth has been notable and currently the Blue Chem Group develops its activity through three companies: Blue Chem – Indústria e Comércio, S.A., based in Portugal, Blue Chem Ibérica, located in Spain and Blue Chem France, for the French market. Blue Chem is one of the main operators in Portugal and has a large presence in Spain, France and North Africa.

**INTEGRATION INTO THE RNM GROUP**

Blue Chem was acquired and integrated in 2021 within one of the references in the chemical sector in the Iberian market, the RNM Group. With this integration, Blue Chem acquired enormous operational, logistical and administrative advantages, as it now benefits from a set of synergies through the acquisition by the RNM Group.

The RNM Group is currently one of the three main operators of chemical products in the Iberian Peninsula.
