The Greenhouse effect

Temperature Anomaly (°C)

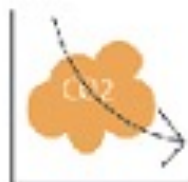

THE KEY ELEMENTS OF THE PARIS AGREEMENT

A text with universal scope, adopted by 195 countries

The aim: to keep the increase in global average temperature to well below 2°C and to 1.5°C if possible.

The objective: to level off greenhouse gas emissions as soon as possible.

The principal: to differentiate between developed and developing countries. Developed countries must lead the way for reduction of emissions and support developing countries in implementing this. Other countries with the ability to do so may also contribute their support on a voluntary basis to achieve this target.

The means: Countries must submit Intended Nationally Determined Contributions (INDCs) which are revised upwards every 5 years. The 1st report is due in 2023. North-South technology transfer.

The financing: from 2020, rich countries must contribute at least \$100 billion per year. This amount will be reviewed in 2025.

The new mechanism: loss and damage. Measures must be taken to avert, minimize and address the concrete effects of climate change, in order to help the most vulnerable countries.

Entry into force: 2020 if the Agreement is ratified by 55 countries accounting for 55% of global greenhouse gas emissions.

MANCHESTER CLIMATE CHANGE ASSEMBLY

Myth-busting

MANCHESTER CLIMATE CHANGE ASSEMBLY

What do you think of when I say climate change?

MANCHESTER CLIMATE CHANGE ASSEMBLY

What do you think of when I say climate change?

How about climate emergency?

MANCHESTER CLIMATE CHANGE ASSEMBLY

**What about people around you?
Family, friends, work colleagues,
what do they think generally?**

MANCHESTER CLIMATE CHANGE ASSEMBLY

How does all this make you feel ?

MANCHESTER CLIMATE CHANGE ASSEMBLY

Do you think people see it as something happening far away or in the future ?

MANCHESTER CLIMATE CHANGE ASSEMBLY

Can you think of any examples that are a bit more local ?

MANCHESTER CLIMATE CHANGE ASSEMBLY

What are your hopes and fears for the future ?
