## PROFESSIONAL EXPERIENCE

- Propel Health Communications**, Engineering & Technical Manager ✉  
Apr 2024 – present  
Remote
  - Manage two large oversea Development teams that deliver Next.js, Vue.js, WordPress websites for multi-million dollar pharmaceutical companies with AWS automated pipelines for continuous integration and delivery.
  - Collaborated closely with cross-functional partners and business stakeholders developing cross team product/technical roadmaps.
  - Redesigned agile/SDLC processes from ideation to delivery and adopted across Development agencies.
- CJM Consulting LLC**, Web Developer Consultant ✉  
Jan 2022 – Apr 2024  
Remote
  - Design, develop and ship high-quality technical solutions that scale across multiple microservices.
  - Rebuilt multiple client sites using React, Svelte, Astro, Eleventy, Tailwind, Node.js, Netlify and AWS.
  - Utilize GitHub CI/CD tools to set up automated pipelines for continuous integration.
  - Consult early Startups and Non-for-Profit organizations with structuring their development processes.
- Cerner Corporation (acquired by Oracle)**  
Lead Fullstack Developer & Team Lead  
Oct 2019 – Jan 2022  
Remote
  - Planned and refactored a monolith to increase load times by 50% with a Jamstack approach using Gatsby with Node.js, styled-components, GraphQL, and REST API.
  - Architected a React/Node.js self-service portal for interfacing with Workday Cloud, reducing data prep work from 5 to 0 hours and increasing payroll donations to \$2.8M/year.
  - Organized fun team building activities and social gatherings
- Senior Fullstack Developer & Team Lead  
Oct 2017 – Oct 2019  
Kansas City, MO
  - Hired 4 software software engineers and mentored them to be top performers.
  - Led teams of 2-4 software engineers, driving successful project completion.
- Senior Fullstack Developer  
Aug 2016 – Oct 2017  
Kansas City, MO
  - Deployed and hosted enterprise-level MariaDB Galera Clusters, reducing build times by 90%.
  - Deployed a web app that generated short links with Google Analytics utm codes for social media, print, and email.
- System Engineer  
Jul 2011 – Aug 2016  
Kansas City, MO
  - Built a public facing website from scratch using a responsive custom theme and an Enterprise CMS framework that included ecommerce for donations.
  - Replaced a \$3K leaderboard with a Single Page App (SPA) jQuery Mobile golf tournament web app, supporting a \$1M fundraising event.
- Intouch Solutions (merged with EVERSANA)**, Mobile Frontend Developer  
May 2011 – Jul 2011  
Overland Park, KS
  - Designed iPad apps using HTML, CSS, and JavaScript for large pharma clients such as Abbott, Pfizer, and Sanofi.
  - Managed app projects using Xcode with SVN integration.
