HYDROTHERAPY PRODUCTS

BE WELL.

So, your bathtub is pretty—just the right shape and size for your bathroom. It's great at being the place where you get clean. And sometimes, when you're up for drawing a bath, it even gives you moments of warmth and relaxation.

But it can, and should, be **SO MUCH MORE.**

Hydrotherapy is the use of water—it's temperature, motion and physical attributes—to relieve our pain, release our tension, and heal our bodies. Understanding it is the key to elevating your bath from a pretty piece of furniture to your very own sanctuary.

Water in motion stimulates our sense of touch and improves our blood flow. The way water moves (fast or slow, forceful or gentle, targeted or not) can profoundly change the way we feel. So can heat, which quiets us and slows our internal functions. Even the weightlessness we experience simply sitting in a bath of water has powerful effects on our bodies, relieving our joints and muscles from the everyday pull of gravity.

Whether your body's pain is a product of stress, age, injury or activity, the right form of hydrotherapy can reverse those effects and help to make sure you start and end every day as the best, most complete version of you.

Soaker

Deep vessels with reclined backrests and, in some cases, built-in armrests ensure this simple water therapy is as immersive and comfortable as can be.

HotSoak™

An upgrade to the soaker, HotSoak adds a quiet circulation system that slowly moves water past a heater. The motion is virtually undetectable, but the constant warmth with no need to re-fill the tub is impossible not to notice.

DriftBath™

A true Aquatic exclusive, up to 70 tiny streams of water flow gently from the backrest, creating a current that feels like the easy movement of a slow-moving river. Unbelievably quiet and designed to stay warm, the DriftBath is built for peaceful escape.

Air Bath

Air is pushed into the bath water through pin-sized portals, forming a blanket of bubbles that dance and swirl from head to toe, creating a gently exhilarating experience.

Whirlpool

Targeted and powerful, for those who give a little more and push a little harder. The force of the water works with the heat of the bath to release muscle tension and treat trouble spots like the neck, back, hips, knees.

Air-Whirlpool Combination

The combination system marries the immersive stimulation of the air bath with the targeted massage of the whirlpool. The ultimate in customized therapy, the independent systems can be used individually, or simultaneously for maximum impact.

WHAT MAKES AN AQUATIC BATH GREAT? IT'S MORE OF A QUESTION OF 'WHO?'

Behind every product is an expert—an engineer, a designer, a machine operator—someone who is passionate about making bathing a comfortable and enjoyable experience for everyone.

So when you choose Aquatic, you're choosing more than a shower, tub or other bath product.

You're choosing people who are the best at their craft. And that means you can relax knowing you're getting the best quality, value and options for your specific need.
