590TP Series – Electronic Faucet
With Surface Mount Control Box and Single Inlet Supply

TECK®
COMMERCIAL

△DELTA.

Specification: (example)

- Supplied as complete product
- **Proximity® Sensing Technology**
- Chrome plated **CAST** Hi-Rise spout
- **Battery** (4 'C' cell) or **Hardwire** (24 VAC) deckmount electronic handwash system
- Adjustable sensing range and timeout
- Forged brass solenoid valve
- Surface mount housing
- Mixing valve required (order separately)
- Serviceable filter screen upstream of the valve

and... with... (specify battery or hardwire)
with... (add spout variation required)
with... (add outlet required)
with... (transformer required for hardwire models – specify separately – See next pages)

*Mixing valve (order separately).
Refer to www.specselect.com for individual models.

Flow Rates are at 60 PSI.
Note: Use all pages as product submittal sheets.

Approvals:

- CSA certified
- Complies to ASME A112.18.1/CSA B125.1
- ♿ Indicates compliance to ICC / ANSI A117.1
- 💧 Outlet options 2, 3 and 6 are EPA WaterSense listed
- Verified compliant with 0.25% weighted average Pb content regulations

(Contact Delta Representative for State and/or Local Approvals.)

590TP0 & 590TP1 SERIES

❑ **590TP0** Hardwire
❑ **590TP1** Battery Operated
❑ **590TP0-BB** Hardwire with Battery Backup

OPERATION:

- Hands free (touchless) operation.
- No visible sensor, the spout is the sensor.
- Water flows when sensing is activated.
- Water flow stops upon de-activiation of sensing.
- Adjustable sensing distance factory set to 76 mm (3").
- Low battery audible beep (for battery models only) will activate after faucet shuts off when approximately 1500 cycles remain.
- Adjustable auto shut off feature. Factory set to 45 seconds.
- Metering mode with selectable flow times of 7 seconds to 4 minutes, factory set off.
- Periodic Rinse feature, time adjustable in 6 hour increments up to 2 days. Selectable rinsing lengths from 10 to 180 seconds. Factory set off.

NOTE 1: For optimum performance of this product, we recommend a system pressure between 20 and 80 PSI static. This product will operate up to a maximum of 125 PSI static per ANSI and CSA requirements. However, we do not recommend pressures above 80 PSI. Thermal expansion or leaking pressure reducing valves may require use of expansion tanks or relief valves to ensure your system never exceeds its maximum intended pressure setting.

**NOTE 2:** Designed for routine 180°F (82°C) disinfection cycles up to 10 minutes.

NOTE 3: Use 3-conductor 18AWG wire between transformer and hardwire converter/driver board earth ground.

NOTE 4: Use Delta Commercial approved transformers and mount the transformer a minimum of 6 inches away from the Delta driver board enclosure.

NOTE 5: Refer to Proximity Application Notes for installation best practices, proper grounding and wiring diagrams on www.specselect.com.
