Rev 4-01

Machine inserted corporation stops were developed by Hieronymus Mueller in conjunction with his development of the drilling and tapping machine used to make pressure taps in water mains. During the development of the machine inserted corporation stop, Mr. Mueller designed an inlet thread which became known as the MUELLER or "CC" thread. This thread form was eventually adopted by the American Water Works Association and is listed in ANSI/AWWA Standard C800 as the AWWA Taper thread.

MUELLER Co. pioneered other design concepts in the waterworks industry such as the copper flare connection, MUELLER 110<sup>®</sup> Compression Connection and the MUELLER ORISEAL<sup>®</sup> Valves, which

use O-ring seals to assure leak-tight performance.

MUELLER Co. offers corporation stops in three designs: machined key (commonly referred to as ground key), ORISEAL type (1-1/2" and 2" sizes only) and ball type.

All three designs are available with a wide range of inlet/outlet combinations including the MUEL-LER 110 Compression Connection and Pack Joint Connection. These three designs are all compatible with the MUELLER line of drilling and tapping machines, and small drilling machines.

#### **MUELLER 300™ Ball Type Corporation Valves**

- □ BLOW-OUT PROOF STEM DESIGN -prevents separation and assures dependable, safe operation.
- ☐ DOUBLE O-RING STEM SEALS - are supported in precision machined grooves and provide secure, leak tight sealing.
- ☐ STAINLESS STEEL REINFORCED SEAT SEAL assures reliable seal under full flow and pressure.
- □ 300 PSIG -maximum working pressure.

■ EXTRA STRONG

 key to ball connection provides strong, reliable performance

and resists breakage.

- ☐ HEAVY BRASS COMPONENTS are constructed of 85-5-5-5 ASTM B62 brass for strength and durability.
- ☐ STRAIGHT-DESIGN allows maximum flow with minimum pressure loss.

- OUTLETS include copper flare connection, MUELLER 110 Compression Connection, MUELLER INSTA-TITE, Pack Joint Connection and iron pipe thread connection.
- STEM ROTATION full 360 degree.

- ☐ MANUFACTURED AND TESTED - to ANSI/AWWA C800 standard.
- □ INLET THREADS
   are either AWWA taper (MUELLER "CC")
  or AWWA iron pipe.
- END PIECE O-RING provides secondary seal to prevent leakage.
- ☐ FLUOROCARBON COATED BALL - ensures smooth, easy turning operation.

## **MUELLER® CORPORATION VALVES**

Rev. 4-0

The MUELLER ORI-CORP® Corporation Valve is an easy turning, O-ring sealed, balanced pressure, plug type valve having a round, full open unobstructed flow way. These valves also feature a heavy one-piece bronze body with integral wrench flats.

The integral plug and key head construction provides maximum strength and positive operation. The large operating head provides more than adequate wrench gripping area for easy operation.

#### **MUELLER ORI-CORP Corporation Valve**

- ☐ INTEGRAL WRENCH FLATS on inlet and outlet of body provide generous wrench gripping area.
- ☐ TOP SEALING O-RING - seals valve from exterior leakage and adds to easy turning qualities.
- ☐ LARGE OPERAT-ING HEAD - provides more than adequate wrench gripping area.
  - ovides PIECE PLUG AND
    OPERATING HEAD
    area. provides strength
    and assures positive
    operation. Quarter
    turn in either direction
    activates valve. An
    integrally cast flange

ring.

☐ INTEGRAL ONE-

- ☐ INLET is available with either AWWA taper (MUELLER "CC") thread or AWWA iron pipe thread.
- STRONG, ONE
  PIECE BODY has
  no cavities that could
  allow debris to collect
  and cause damage to
  the plug.
- TOPIC ORIS
- ☐ FULL FLOW round way plug opening provides straight through passage with no obstruction.

at the top of the plug

to protect the top O-

functions as a dirt seal

- BRONZE RETAIN-ING RING secures plug in body and also functions as a dirt seal to protect bottom Oring. Since this valve is a balanced pressure type, there is no force tending to eject the plug or load the retaining mechanism.
- □ BOTTOM SEALING O-RING - seals valve from leakage and adds to easy turning qualities.
- ☐ OUTLET PORT SEALING O-RING is totally confined in a machined groove to provide positive leaktight shutoff.
- ☐ INTEGRAL OUTLET is available with either MUELLER 110® Conductive Compression Connection, outside iron pipe thread or inside iron pipe thread.
- ☐ 175 PSIG maximum working pressure.

Rev 4-01

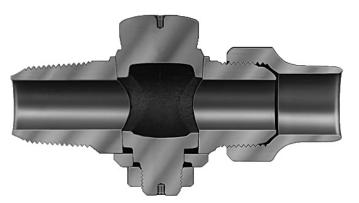

MUELLER CO. has been manufacturing ground key corporation stops since 1870 and many features of the modern day stops were developed by MUELLER CO.

These features include a brass alloy, and inlet thread and outlet connections that were eventually adopted as American Water Works Association Standards.

#### **MUELLER®** Ground Key Design Corporation Valves

- BODY is cast from 85-5-5-5 ASTM B62 brass alloy for strength and corrosion resistance.
- ☐ INTEGRAL OUTLET available with a wide variety of outlet end connections including the MUELLER 110® Compression Connection, MUELLER Pack Joint Connection, MUELLER INSTA-TITE® Connection, copper flare, inside iron pipe, outside iron pipe, increasing iron pipe, **MUELLER Coupling** Thread and other popular connections.
- ☐ STRAIGHT THROUGH DESIGN - allows maximum flow with minimum pressure loss.

☐ KEY AND BODY - are precision machined to assure sealing surfaces match.

- 1 100 PSIG maximum working pressure for 1/2," 3/4" and 1" sizes. 80 PSIG maximum working pressure for 1-1/4", 1-1/2" and 2" sizes.
- ☐ "D" SHAPED
  WASHER turns with
  key to prevent loosening of key nut.

or AWWA iron pipe thread.

MANUFACTURED

☐ INLET THREADS

taper thread

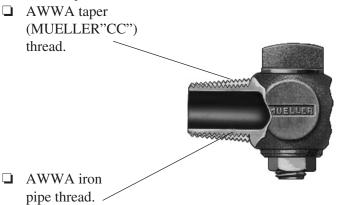

are either AWWA

(MUELLER "CC")

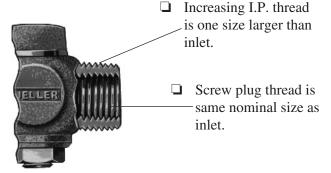

AND TESTED - to ANSI/AWWA C800 Standard.

☐ KEY NUT - is designed so overtightening will strip stem threads instead of breaking stem.

†Gasket and gripper band assembly

# MUELLER INSTA-TITE Connection optional equipment Pipe beveling tool

To assure proper installation, the end of the pipe or tubing must be properly beveled before it is inserted into the MUELLER INSTA-TITE Connection. MUELLER CO. offers special beveling tool for CTS PE tubing and IPS PE pipe.

PART NUMBER: **H-18015** for 3/4" and 1" CTS tubing PART NUMBER: **H-18017** for 3/4" and 1" IPS pipe

#### Pipe removal tool

Pipe or tubing may be removed from the MUELLER INSTA-TITE Connection using special removal tools. Use one tool for 3/4" size connection and two tools for 1" size.

for 3/4" size connection and two tools for 1" size.

PART NUMBER: **506336**

#### I.P. thread copper flare connection optional equipment

#### I.P. thread copper flare nut

This connection thread is one size larger than the copper tubing to be flared.

CATALOG NUMBER: H-15432

#### Solid copper disc

Used with regular copper flare nut to shut off line.

CATALOG NUMBER: H-15535

1/2"	3/4"	1"	1-1/4"	1-1/2"	2"

#### **Brass cap**

Fits on copper flare spud to cap off line.

CATALOG NUMBER: H-15540

3/4" 1" 1-1/2" 2"	
-------------------	--

#### **Flaring Tool**

Used to make 45° flare on type "K" copper tubing. CATALOG NUMBER: H-18000

1/2"	5/8"	3/4"	1"

#### **Drilled Flaring Tool**

Used to make 45° flare on type "K' copper tubing without shutting off water-drilled to exhaust water at right angle to tubing.

CATALOG NUMBER: H-18005

3/4" 1"

#### Reamer

Used to ream the inside of type "K" copper tubing to remove burrs prior to flaring.

CATALOG NUMBER: H-18010

1/2	1/2"	3/4"	1"
-----	------	------	----

#### **Brass Hammer**

H-18025

Solid brass head with 10" wooden handle. Weight 2- 3/4 lb. **CATALOG NUMBER:** 

Note: When using any striking tool, safety eye protection must be worn. Inspect hammer and tools for any damage after each use and repair or replace if mushrooming or chipping evident.

#### **Corporation Valve Wrench**

For operating up to and including 1" corporation and valves.

CATALOG NUMBER: **H-10048**
