

SURPRISINGLY LIGHT. EXCEPTIONALLY STRONG.

INTRODUCING DURALITE™

The performance you need - the ease of installation you love. The Duralite[™] family of enclosure deliver unexpected Tier 15 load rating performance in the lightweight enclosure category. Engineered to withstand heavy loads, Duralite[™] intelligently blends composite materials to provide durable, accessible security to our necessary infrastructure.

THE RIGHT FIT FOR YOUR NEEDS.

The Duralite[™] family of enclosures has a wide scope that spans popular market sizes, from small pull box applications to larger 24" x 36" vaults and everything in between. With extensive lid and accessory options, Duralite[™] provides an ideal solution for your needs.

ENGINEERED WITH YOU IN MIND.

Duralite[™] was engineered to provide a versatile, high-quality solution for contractors. The lightweight design allows for safer installations and the uniquely strong and durable material is easily modified in the field with the use of basic tools.

THE STRENGTH OF POLYMER CONCRETE DELIVERED AT 50% OF THE WEIGHT.

LIGHTWEIGHT

Duralite[™] features a lightweight design allowing for easier, safer handling and installation. Many of the Duralite[™] enclosures can be handled by just one person, per OSHA guidelines. Lift light, lift right.

STRONG

Strength and durability are key features to the Duralite™ family. The durable design and material overcome many common challenges traditional enclosure materials experience like chipping or cracking.

MODIFIABLE

Duralite™ allow for easy field modification with simple power tools. With a common 18V cordless drill and a hole saw, contractors or installers can modify these enclosures quickly and with minimal dust.

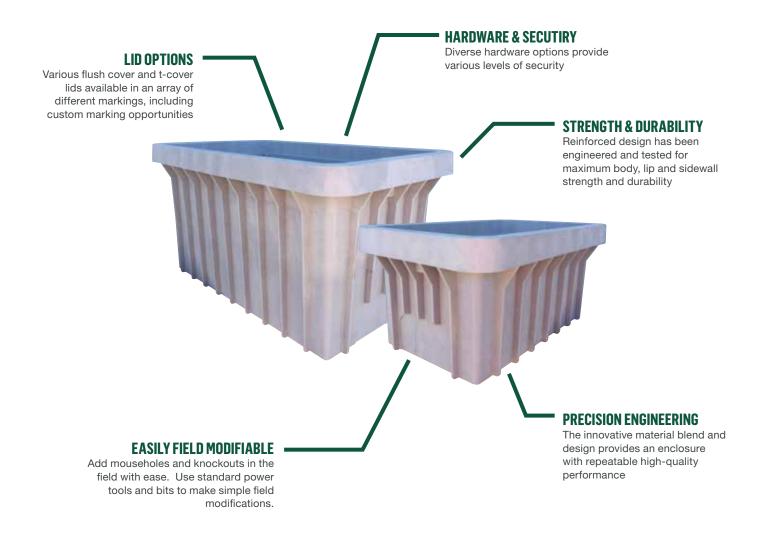

VARIETY OF SIZES

We understand that variety is important to meet the various needs of your projects, which is why we designed Duralite™ in a range of sizes and depths to provide the right enclosure for your project.

DURALITE™ FEATURES

DURALITE™ COMPOSITE ENCLOSURE FAMILY

Material	Model	Size (L x W)	Shape	Wall Type	Depths	Performance	Rating
	1015	10" x 15"			12", 18"	Tier 15, Tier 22	Heavy Duty
	1015MAX	10" x 15"			12"	Tier 15, Tier 22	Heavy Duty
Polyolefin	1118	11" x 18"		Straight	12", 18"		
Blend	1324	13" x 24"		Straight	12", 18"	Tier 15	Medium Duty
	1730	17" x 30"			12", 18"	Her 15	
	2436MAX	24" x 36"			24"		

NOTE: Actual load rating is dertermined by the box and cover combinations. Dimensions may vary slightly.

BOLT DOWN MARKING PLATE SYSTEM

Simplify lid inventory and customize your enclosures at the time of installation. Our polymer concrete and composite lids available on the DuraliteTM boxes feature a molded-in recess to allopw marking plates to be installed at the factory, distribution center, or customer location. A wide variety of standard markings are available as listed in this document in addition to custom plate markings.

INSTALLATION GUIDELINES AND INSTRUCTIONS

For optimum results, the lid and marking plate should be clean and dry. The marking plate will have a grid pattern on the back side.

- Apply a moderate amount of Surebond SB-12 adhesive (approximately 1/8" bead) in a wave-like pattern with a border (see figure 2) starting and ending approximately 3/8" from pocket sides. Using excessive adhesive will slow curing process.
- Place marking plate in pocket (figure 3) and apply continual pressure to the top of the plate for 10 seconds.
- Adjust marking plate to the center of the pocket and ensure it is below or flush with the lid surface before adhesive sets.
- Tack-free time is 10-20 minutes and full cure is approximately 24 hour.
- Using the spanner bit, screw the two spanner bolds hand-tight into the holes of the marking plate.
