Warranty • Disclaimer of Warranty
Proper fastener connection design takes in to account where and how fasteners are used. Allowance for special characteristics in materials, differences in types of materials being joined, unique or unusual environmental service or installation conditions and the safety factors required by anticipating normal or short term loading conditions must be considered. Due to possible differences in specifications, applications, and interpretation of results, purchasers and specifiers must make their own evaluation of the products, to determine the suitability of these products for intended use. All warranties of Buildex products, expressed or implied, including the warranties of merchantabilty and fitness for particular purposes are specifically excluded except for the following: Buildex will repair or replace any product which, within twelve months after sale by Buildex or its distributors, is found by Buildex to be defective in material or workmanship - normal wear and tear accepted. This is the sole warranty of Buildex and the sole remedy available to distributor or buyer. Buildex shall not be liable for any injury, loss or damage, direct, indirect, or consequential, arising out of the use of, or the inability to use, any Buildex product.

### INSTALLATION INSTRUCTIONS FOR WOOD & STEEL

#### **INSTALLATION STEPS - VERTICAL INTO WOOD & STEEL:**

- 1. Insert the appropriate nut driver into a 3/8" or 1/2" portable drill.
- 2. Insert the SAMMYS® into the #14 (black) nut driver (p/n 8113910). Drill should be in a vertical position.
- 3. Push the face of the nut driver tight to the member. Begin installation when the nut driver spins freely on the SAMMYS, stop drill and remove.
- 4. The SAMMYS is now ready to receive 1/4", 3/8", 1/2" or metric all thread rod, bolt stock. (The 1/2" requires the #14SW red nut driver)

Note: When installing DSTR, follow the above instructions, then add retainer nut and torque to 20 foot lbs. for maximumpullout in purlin steel.

#### **INSTALLATION STEPS - HORIZONTAL INTO WOOD & STEEL**

- 1. Insert the appropriate nut driver into a 3/8" or 1/2" portable drill.
- 2. Insert the SAMMYS into the #14SW (red) nut driver (p/n 8114910). With drill unit in a horizontal position and at a right angle to the structural member, begin installation.
- 3. When the nut driver spins freely on the SAMMYS, stop the drill and remove
- 4. The unit is now ready to receive 1/4", 3/8", M10, M8 or metric all thread rod or bolt stock.

Note: When installing SWDR, follow the above instructions, then add retainer nut and torque to 20 foot lbs. for maximum pullout in purlin steel.

### INSTALLATION INSTRUCTIONS FOR CONCRETE

#### **INSTALLATION STEPS - VERTICAL INTO CONCRETE:**

- 1. Using an SDS 250 carbide tip bit or a HEX RECEIVER with a #250 carbide tip bit, pre-drill the concrete member to a depth of 2" with a hammer/rotary hammer drill set on impact mode.
- 2. After pre-drilling has been completed, install the SLEEVE TOOL over the bit (the bit should remain in the drill), and insert the #14 (black) nut driver (p/n 8113910) into the opposite end (see Vertical Installation note above).
- 3. Insert the CST screw into the nut driver.
- 4. Place tip of screw into the pre-drilled hole, turn impact/drill unit to drill mode and begin insertion. When the nut driver spins freely on the CST screw, installation is complete. Stop and remove drill.
- 5. The concrete screw is ready to receive 1/4", 3/8", 1/2", or metric all thread rod or bolt stock. (#14SW red nut driver used with 1/2" screw)

Note: Use a 1200 maximum RPM drill for installation.

Note: Do not install concrete screws while the drill unit is in impact mode doing so will destroy the pullout factor of the screw.

#### **INSTALLATION STEPS - HORIZONTAL INTO CONCRETE:**

- 1. Using an SDS 250 carbide tip bit or a HEX RECEIVER with a #250 carbide tip bit, pre-drill the concrete member to a depth of 2" with a hammer/ rotary hammer drill set on impact mode.
- 2. After pre-drilling has been completed, install the SLEEVE TOOL over the bit (the bit should remain in the drill), and insert the #14SW (red) nut driver (p/n 8114910) into the opposite end.
- 3. Insert the SWC screw into the nut driver.
- 4. Place tip of screw into the pre-drilled hole, turn impact/drill unit to drill mode and begin insertion. When the nut driver spins free on the SWC screw, installation is complete. Stop and remove drill.
- 5. The SWC screw is ready to receive 1/4", 3/8" or metric all thread rod or bolt stock.

Note: Use a 1200 maximum RPM drill for installation.

Note: Do not install concrete screws while the drill unit is in impact mode doing so will destroy the pullout factor of the fastener.

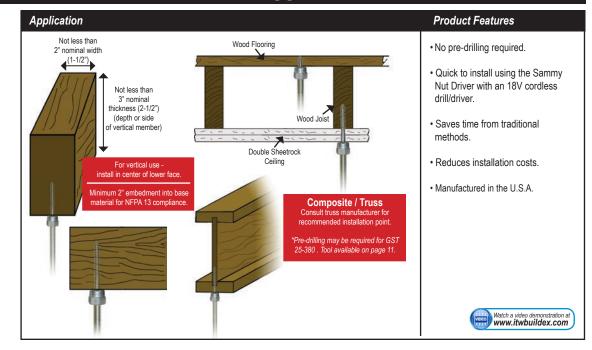

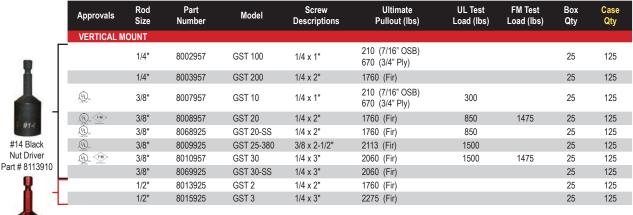

SPECIAL NUT DRIVER SYSTEM: The nut drivers were designed with a unique spin-off feature which provides a fast and safe installation each time. When the face of the driver comes into contact with the material you are installing into, continue drilling until nut driver spins free. Installation is then complete. Warranty requires the use of the appropriate nut driver for installations.

## SAMMYS® FOR WOOD

### SAMMYS® FOR WOOD - Vertical Application

SPECIAL NUT DRIVER SYSTEM: The nut drivers were designed with a unique spin-off feature which provides a fast and safe installation each time. When the face of the driver comes into contact with the material you are installing into, continue drilling until nut driver spins free. Installation is then complete. Warranty requires the use of the appropriate nut driver for installations.

### SAMMYS SWIVEL HEAD™ FOR WOOD - Swivel Application

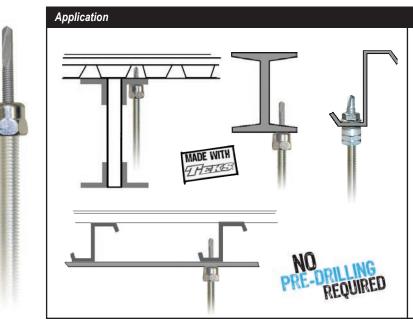

- Eliminates distortion of threaded rod.
- Accommodates up to 3 1/2" x 12 pitch roof.
- Allows 17° deflection from vertical.
- Saves time from traditional methods.
- · Reduces installation costs.
- Manufactured in the U.S.A.

<sup>#14</sup> SH Orange Nut Driver Part # 8273910

### SAMMYS® FOR STEEL

### SAMMYS® FOR STEEL - Vertical Application

#### **Product Features**

- Made with Teks<sup>®</sup> self-drilling fasteners no pre-drilling required.
- Installs into steel range from 20 gauge – 1/2" thicknesses.
- · Saves time from traditional methods.
- · Reduces installation costs.
- Quick to install using the Sammys Nut Driver with an 18V cordless drill/driver.
- A standard screwgun with a depth sensitive nosepiece should be used to install Teks.
   For optimal fastener performance, the screwgun should be a minimum of 6 amps and have an RPM range of 0-2500.
- · Manufactured in the U.S.A.

### SAMMY X-PRESS® Installs into Metal Deck, Purlin, or Tubular Steel

### SAMMY X-PRESS® - Vertical Application

#### **Product Features**

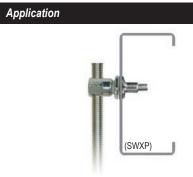

- The Sammy X-Press expands to provide direct vertical attachment in:
  - light gauge steel deck or purlin (22 ga. 1/8").
- Installs in seconds with Sammy X-Press It<sup>®</sup> Tool, saving time & installation costs.
- Use in applications where access to the back of the installed fastener is prohibited. ie. metal roof deck, tubular steel, or vapor barrier fabric.
- Less jobsite material needed.
- No retaining nut required.
- · Provides design flexibility.
- · Manufactured in the U.S.A.

### SAMMY X-PRESS SWIVEL™ - Swivel Application

### Product Features

- The **Sammy X-Press Swivel** allows you to hang plumb in extreme roof pitches:
  - 89° in z-purlin
  - 45° in metal deck for 12/12 pitch
- Installs in seconds with Sammy X-Press It® Tool, saving time & installation costs.
- Use in applications where access to the back of the installed fastener is prohibited. ie. metal roof deck, tubular steel, or vapor barrier fabric.
- Less jobsite material needed.
- No retaining nut required.

5/16 x 1-3/4"

SPECIAL NUT DRIVER SYSTEM: The nut drivers were designed with a unique spin-off feature which provides a fast and safe installation each time. When the face of the driver comes into contact with the material you are installing into, continue drilling until nut driver spins free. Installation is then complete. Warranty requires the use of the appropriate nut driver for installations.

<sup>\*</sup> Tested in 3000 PSI concrete

### CONCRETE | WOOD INSTALLATION KIT

8122910	Concrete Installation Kit (a)	
	Kit includes the following items:	
8113910	#14 Black Nut Driver (b)	1
8114910	#14 SW Red Nut Driver (c)	1
8116910	#250 Bit (1/4") (d)	1
8117910	SDS Bit (1/4") (e)	1
8118910	7/32 Wood Bit (f)	1
8120910	HEX 250 Bit Receiver (1/4") (g)	1
8098910	SL 250 Sleeve (h)	1
8121910	SDS B250 Bit Receiver (1/4")*	1

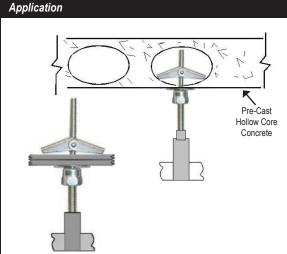

<sup>\*</sup>Only sold separately - not included in kit.

Part Number

### **ACCESSORIES**

### SAMMYS TOGGLE™

#### Installation Steps

- 1. Pre-drill a 5/8" hole with a regular drill or hole saw.
- Insert SST screw into #14 black nut driver. With wing nut and washer on bolt, insert wing nut through surface, and begin installation.
- When bolt is secure and nut driver spins free, stop drill motor and remove.
- 4. SST screw is now ready to receive 1/4", 3/8", or Metric all thread rod or bolt stock.

### SPEEDY POLE TOOL™ & UNIVERSAL SOCKET KIT

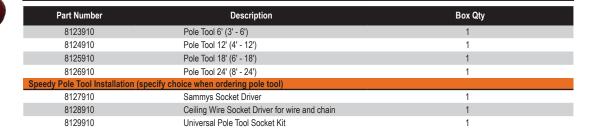

### Universal Pole Tool Socket Kit (8129910) Includes:

- · Adaptor Plug (a)
- Socket Driver for SAMMYS (b)
- Socket Driver for Ceiling Wire Screws (c)
   Socket Driver for 1/4" Standard Nut Drivers (d)
- Stud Plug for Viper or Ladd Powder Actuated Attachment (e) (Items not sold seperately)

### Product Features

- The Pole Tool and Universal Socket Kit provide easy and safe installation for:
  - Sammys
- Jack Chain
- Threaded Rod
- Wire
- Pencil Rod
- Screws
- Ceiling Screws
- Ideal for retrofit and hard-to-reach projects in wood and steel.

### **SPOT-RITE LEVEL™**

- 1/2", 3/4", and 1" threading
- Magnetic strip for ease of use
- Pocket Sized
- Lightweight
- $\bullet$  3-vial design for measurement of 0°, 45°, and 90° angles

#### **SPECIAL NOTES**

#### **Engineering Note**

In 1996, the anchors listed by UL were tested in plate steel that measured .188" and .118". Subsequent testing was done for z-purlin applications in May 1997 using (.037") or 20 gauge steel. Most recently in 2008, testing with the new Sammy X-Press® was completed using (.030") or 22 gauge steel metal deck.

#### Sammys<sup>®</sup> Nut Drivers

Special nut drivers were designed to be used with Sammys. When the appropriate nut drivers are used for installation, the driver spins freely on the screw after installation is complete and eliminates the expected wrist snap, reduces over-torque, and prevents screw failure.

Due to variations in hardness of certain metals, it should be noted that our self-drilling screws for steel will experience different drill speeds. 500-1500 RPM drill speed should be used

#### **Metric Products**

Metric versions of the Sammy anchors are available at www.itwbuildex.com

#### **Sammys for Seismic**

Please visit www.itwbuildex.com for our current Seismic product offerring.

#### Vibratory Environments

For attaching or anchoring in high vibratory environments, special care should be taken not just for building attachments but also for the hangers or assemblies being supported. Consult local code authorities for accepted anchoring devices.

#### **Composite Joist/Truss**

Truss manufacturers vary installation recommendations for composite joist. UL testing was completed to validate that Sammys and Sidewinders SWG 20 and SWG 25-380 can be installed into the top cord of a truss. Sammy GST 20 can be installed into the center of the lower cord of a composite joist. Penetration of the upright center web is permitted by some joist manufacturers. Consult truss manufacturer for recommended installation point.

Pre-drilling may be required by joist manufacturers. If so, pre-drill pilot hole 1/8" smaller than root diameter of fastener.

Consult the table below:

Model	Root Diameter	Hole Size
GST 20	.182"	1/8"
GST 25-380	.280"	7/32"
SWG 20	.182"	1/8"
SWG 25-380	.280"	7/32"

To increase efficiency of the installation process, sleeve tools, bit receivers, and wood bits are available for pre-drilling.

#### **NFPA/NEC Standards**

All UL and FM testing complies with NFPA 13 and NEC standards. Check with your local (AHJ) Authority Having Jurisdiction to confirm application and usage.

**UL Listings / FM Approvals**UL and FM reports are available at www.itwbuildex.com

### **Technical Drawings**

Technical drawings are available and can be downloaded at www.itwbuildex.com in the following formats: .dwg, .dxf, and .igs.
