

HALO™ Low Carbon Aluminum for Closure Applications

Constellium

HALO™ is a label and a guarantee for low-carbon closure sheet solutions.

- Products (Alloy 8011 and 3105) with a cradle-to-gate Carbon Footprint of equal or less than 4 t CO₂ eq. / t
- HALO™ low-carbon solutions have the same properties, performance, durability, and recyclability as our standard solutions
- Available across our portfolio of closure products, including solutions for wine, spirits, water and carbonated soft drinks
- Can be offered as ASI certified metal
- Third-party verified with annual reporting and transparent communication

Aluminum, with its unique characteristics, is the sustainable choice for packaging.

It's lightweight, durable, and endlessly recyclable without losing its properties or performance. Advanced aluminum solutions from Constellium empower brands to deliver premium packaging experiences with a lower carbon footprint.

At Constellium, we are committed to partnering with closure manufacturers and brand owners, offering low-carbon solutions that support your sustainability ambitions. We provide aluminum sheet for closures with guaranteed low carbon footprint.

Greenhouse gas emissions across Scopes 1, 2, and 3 are reported in accordance with the GHG Protocol Accounting and Reporting Standard. Data on Scope 1 and 2 emissions, their intensity, Scope 3 emissions, and the percentage of recycled input material is third-party verified. In addition, our calculation methodologies, data communication, and product family-level reporting are independently verified.
