

**WE NEED YOUR HELP TO SHAPE THE DESIGN
+ ZONING OF OUR FUTURE TOWN CENTER!**

SOUTH LINCOLN REVITALIZATION PROJECT

The Town of Lincoln is working to make the Lincoln Station area a place that is vibrant and walkable.

The South Lincoln Revitalization Project is part of an ongoing effort to create new land use regulations to encourage the development of a vibrant town center with a mix of housing and commercial choices.

Past studies consistently identify the creation of a vibrant, walkable, and sustainable village center as a top land use priority. The Project builds on the 1998-1999 Town Wide Charrette/South Lincoln Area Planning Committee, the 2010 Master Plan, the Lincoln Station Plan of 2014, the Conway School's Place Making Study of 2016, and the 2017 The Green at Lincoln Station (Placemaking Plan).

COMING SOON!
