

# *Transforming Competing Priorities to Mutually Beneficial Outcomes*

## Listening Session Questions

### **Open Space + Natural Resources/ Housing/ Land Use**

- There's a demand for more housing – variety and types, and a desire to maintain natural resources – what are the ways that each of these goals can support the other?
- What do you think should be criteria for choosing priorities and projects?
- What are other considerations (transportation, economic development) that could have positive benefits for housing and environment goals?
- What are potential Town resource implications to solutions – financial, land, and/or human resources?
