

Smooth RV Start™

POWERED BY **5-2-1®**

TRUSTED BY HVAC-R INDUSTRY OEMS WORLDWIDE

Adventure farther with the Smooth RV Start™ compressor saver with RV A/C inrush current management (ICM) technology.

Powered by OEM-trusted 5-2-1® ICM Technology

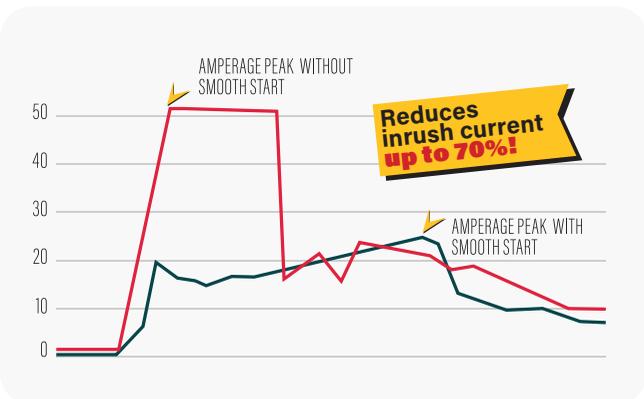

The Smooth RV Start™ capacitor leverages proven 5-2-1® ICM Technology, trusted by HVAC/R industry OEMs worldwide, to deliver smooth, consistent power, specifically designed for RVs, motorhomes, campers, mobile trucks and tiny homes.

Key Advantages

- ✓ Allows running a smaller generator
- ✓ Use of additional appliances while A/C is on
- ✓ Significantly reduces A/C start-up noise

Avoid costly repairs or unexpected outages.

Experience peace of mind and substantial savings by avoiding unnecessary maintenance and repairs. Say goodbye to power worries and hello to cool comfort—even with two A/C units on a 30 amp hookup!

ICM IN-RUSH CURRENT MANAGEMENT FOR RV A/C SYSTEMS

Reliable RV Power

✓ A/C UNIT

✓ ICE MAKER

✓ HEAT PUMP

✓ MICROWAVE

✓ REFRIGERATOR

✓ HAIR DRYER

Rubber sleeve encases components providing water resistance and enhanced protection

Start-up is the most demanding moment for any electrical appliance in your RV. Have you noticed appliances often fail at the moment they're switched on, not while already running? That's because of the high electrical current surge at startup.

The A/C in your RV pulls more power during startup than any other appliance onboard. This startup surge can stress and damage your compressor, which may start hundreds of times during a single season.

Smooth RV Start™ dramatically reduces the duration and intensity of this high amp startup. Now, you can add Smooth RV Start™ easily and affordably to your existing RV air conditioning system.

Its advanced technology smoothly ramps up power, slashing startup current by an impressive 50-70% or more. That means a rooftop 16,000 BTU, 120V A/C unit can start up with less than 20 amps!

EASY START-UP

Reduces electrical demand at startup, allowing the A/C to run smoothly even with smaller generators or limited power sources.

PROTECTS A/C UNIT

Minimizes wear and tear by reducing startup stress, significantly extending the compressor's lifespan.

RELIABLE COOLING

Makes boon-docking and camping at remote locations more comfortable, even with limited shore power.

PREVENTS POWER SURGES

Safeguards sensitive electronics by eliminating sudden voltage spikes when the A/C kicks on.

QUIET OPERATION

Soft-start ICM technology reduces loud, noisy and jolting startup sounds.

GENERATOR-FRIENDLY

Enables use of smaller, quieter, and more fuel-efficient generators.

ENERGY EFFICIENT

Lowers power consumption at startup, saving energy and reducing fuel costs over time.

Components

Smooth RV Start™ comes pre-wired with three simple, color-coded connections for straightforward installation: Black for Common, Striped for Start, and Red for Run.

Specifications

Part number:	SSRV2
Capacity:	1.1 - 2.5 Tons
Wattage:	3000W or higher
Power Source:	115V - 240V AC
Packaging dimensions:	3.25" x 3.25" x 8"
Packaging weight:	15.6 oz
UPC	750377122613
