

Built-in adapter organizer

includes 19-piece adapter kit

Features:

- Compatible with DOT 3, DOT 4 and DOT 5 brake fluids
- Engineered with pulsating flow to purge air bubbles efficiently
- Operates on a 110-volt power supply
- Suitable for ABS, ESP, EDS and SBC
- Designed for one-person operation
- 6-liter oil reservoir for extended flushes
- Expanded 19-adapter kit for wide vehicle coverage
- Includes dual waste fluid bottles

500-8200

FASTER, SAFER BRAKE FLUID FLUSHES WITH EFFORTLESS ONE-PERSON OPERATION

Designed for automotive professionals, BrakeVac™ III offers a fast, clean and complete brake fluid exchange with advanced pulsating flow technology. This automatic pulsing action pushes fluid through the system while actively eliminating air bubbles that can impair brake performance.

Compatible with DOT 3, DOT 4, and DOT 5 brake fluids, BrakeVac™ III connects to a 110-volt power source and is built for single-technician use, streamlining workflow and reducing labor costs.

Whether you're aiming to improve service times or elevate safety standards, BrakeVac™ III is your all-in-one solution for professional-grade brake fluid exchange.

Efficient Air Bleeding: The automatic, pulsating flow ensures a complete fluid exchange and minimizes trapped air—critical for safe, responsive braking.

User-Friendly Operation: One-person design streamlines workflow and reduces labor costs.

Versatile Compatibility: Flushes multiple brake fluid types (DOT 3, DOT 4, and DOT 5) for broad service coverage.

Extended Service Capacity: A large 6-liter oil reservoir supports uninterrupted operation, reducing the need for frequent refills during multiple vehicle services.

Workshop-Ready: Powered by 110V, BrakeVac™ III is dependable and adaptable to a wide range of professional automotive environments.

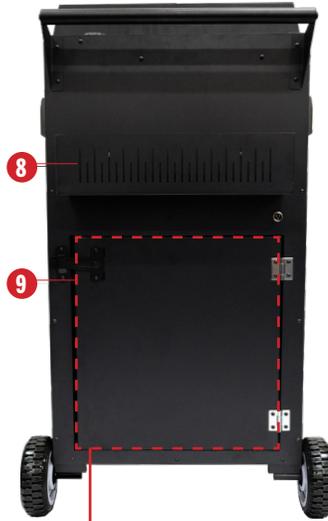

Specifications

Power Supply.....	AC 110 ±10%
Max. Power.....	35W
Flow Rate.....	2.6L/min
Working Pressure.....	1.5-2.0bar (Standard Mode) 2.0-2.5bar (Fast Mode)
Filling Hose Length.....	12' (3.5m)

MOTORVAC® BRAKEVAC™ III PREMIUM BRAKE FLUID FLUSH SYSTEM

1. Pressure Gauge
2. Pressure Adjust
3. Low Brake Fluid
4. In Service
5. Breaker
6. Start
7. Switch-On/Off

Built-in adapter organizer

Expanded 19-piece adapter kit delivers wide compatibility and convenience.

Comes in a rugged carrying case, or keep organized onboard in the machine's rear toolbox for quick access.

Packaging Specifications

CPS Part#	500-8200
Brand	MotorVac®
Description	BRAKEVAC™ III Premium Brake Fluid Flush System
UPC	750377122279
HTS Code	8479.89.958.5

Unit Weight	w/adapters	60.87 lb
	w/o adapters	55.86 lb
Unit Length	23.0 inches	
Unit Width	28.0 inches	
Unit Height	38.5 inches	

Shipping Weight	140 lb
Case Length	32.7 inches
Case Width	26.4 inches
Case Height	46.0 inches
Warranty	1 Year
