

Blue-Point®

EEDF400-4

Adapter EGR Mercedes/Universal

WARNING: Wear gloves and safety goggles (User and bystanders) when performing this service

Important: A DPF Regeneration event is required after this service. Regeneration can be initiated for many engines using one of the following Snap-on Diagnostic Tools:

- EEHD184040 Pro-Link Ultra (Snap-on)
- EEHD186030 Pocket IQ2 (Blue-Point)

1. Add Blue-Point (EEDF400-INJ) Diesel Fuel Injector Cleaner to vehicle's fuel tank.
2. Remove plastic engine cover.
3. Remove Turbo Boost Pressure sensor from intake. Do not disconnect wire connector. Install adapter in its place.
4. Attach EGR tool to adapter. Ensure air valve and fluid valve are closed.
5. Unscrew fill cap and fill with 32oz (950ml) of EGR Cleaner. For first application or severe coking, 64 oz. may be required.
6. Reinstall the fill cap and hang tool from the hood latch. Connect shop air. Set air pressure on EGR tool to 40-50 psi.
7. Start vehicle engine. Set engine idle to 1500 rpm.
8. Open Air valve, adjust regulator to maintain initial pressure then open the fluid valve on the tool.
9. Continue service until EGR tool is empty.
10. Turn the fluid and air valve on tool to the closed position. Turn Vehicle off. Detach shop air line and depressurize the tool by rotating the regulator knob counter clockwise.
11. Remove adaptors and reassemble vehicle components in the reverse order of removal.
12. After service reset any engine codes and perform a road test to clear any residual fluid from system. Vehicle may experience regen cycle during road test.
